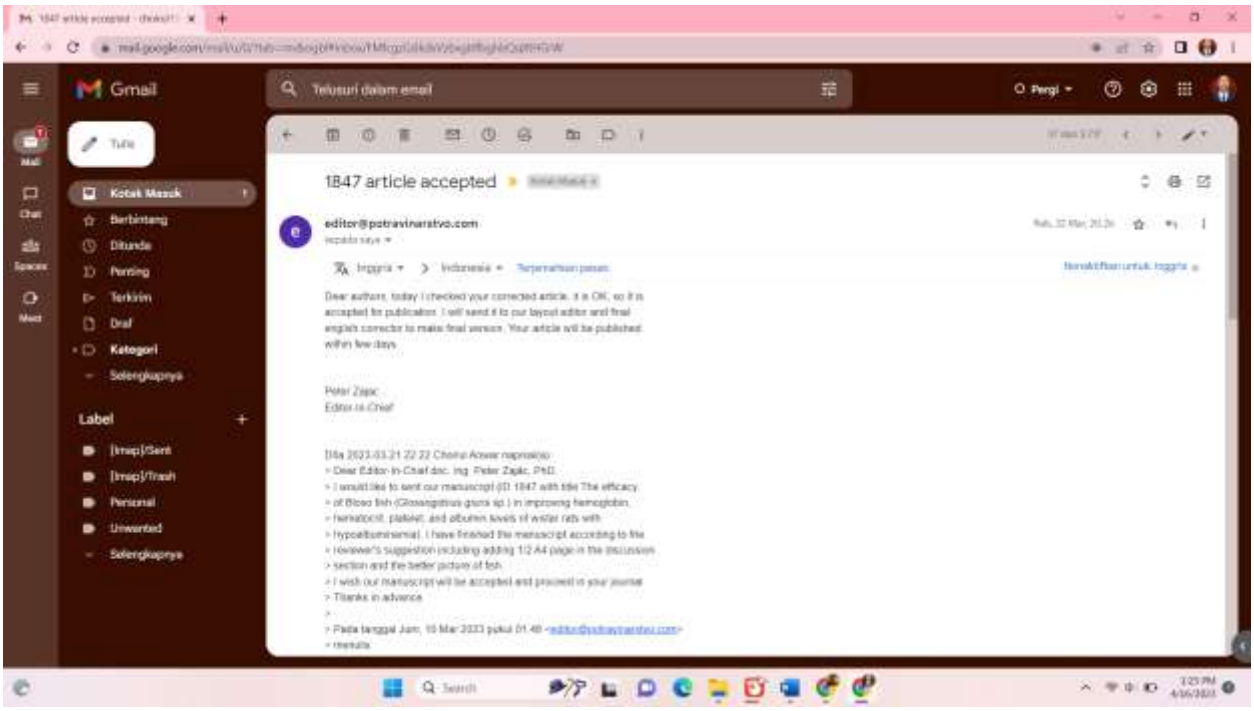
1847 sedond review

editor@potravinarstvo.com

Dear authors, I am sending you the second review of your article. The opponent stated that the article could be published after considering his remarks, which can be found as comments directly in the article. Please correct and mark the corrections so I can check them. Subsequently, I will accept the article and send it for finalization.

Editor comment:
There are no major problems with your article. , from a methodology and practical point of view, it is well written. On the other hand, I think you can improve the discussion section (add at least 1/2 of the A4). YOur article will looks better and the probability of citations of this article will increase.

I agree with the reviewer: you would use a better picture of fish , this one looks not very professional. You can use more pictures, usually articles with better visual aspects are more cited.



1847 article accepted

editor@potravinarstvo.com

Dear authors, today I checked your corrected article. It is OK, so it is accepted for publication. I will send it to our layout editor and final english corrector to make final version. Your article will be published within few days.

[Potravinarstvo] Submission ORCID
doc. Ing. Peter Zajác, PhD.
Dear Muhammad Chomat Anwar,
You have been listed as an author or a manuscript submission to Potravinarstvo Slovak Journal of Food Sciences.
To confirm your authorship, please add your ORCID id to this submission by visiting the link provided below. You need only to click the link and your authorization is done.
This is an automatic e-mail generated by our editorial system. Please do not answer.
What is ORCID id? It is a unique identifier of author, which helps the indexation services like SCOPUS, WOS, or university libraries to clearly identify the authorship of the article. Sometimes authors may have the same first and family names around the world and it is hard to distinguish who is the author. ORCID number is solving this problem.
More information about ORCID at Potravinarstvo Slovak Journal of Food Sciences.

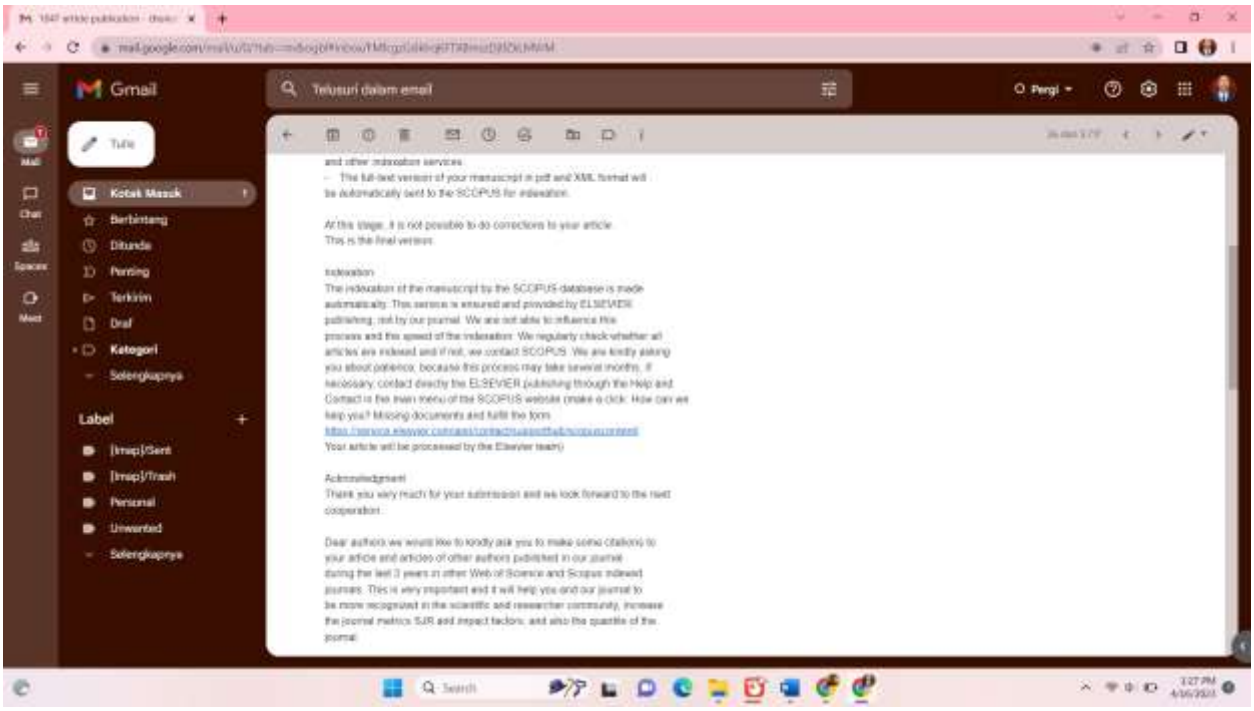
1847 article publication
editor@potravinarstvo.com
Dear authors,
Your manuscript was published today 27th of March 2023.
We are sending you:
- The last version of the manuscript (PDF and DOCX).
- The HTML version of your manuscript will be prepared and will be available soon on our website.
- Metadata (Article title, abstract, author names, author e-mails, author ORCID, author affiliation, journal title, journal volume, and article pages) will be automatically sent to the SCOPUS, DOAJ, CROSSREF and other indexation services.
- The full-text version of your manuscript in pdf and XML format will be automatically sent to the SCOPUS for indexation.
At this stage, it is not possible to do corrections to your article. This is the final version.
Indexation
The indexation of the manuscript by the SCOPUS database is made automatically. This service is ensured and provided by ELSEVIER publishing, not by our journal. We are not able to influence this.



and other indexation services.

Indexation
The indexation of the manuscript by the SCOPUS database is made automatically. This service is ensured and provided by ELSEVIER publishing, not by our journal. We are not able to influence this process and the speed of the indexation. We regularly check whether all articles are indexed and if not, we contact SCOPUS. We are kindly asking you about patience, because this process may take several months. If necessary, contact directly the ELSEVIER publishing through the Help and Contact in the main menu of the SCOPUS website (make a click: How can we help you? Missing documents and fulfill the form
https://service.elsevier.com/app/contact/supporthub/scopus/none/
Your article will be processed by the Elsevier team)

Acknowledgment
Thank you very much for your submission and we look forward to the next cooperation.

Dear authors we would like to kindly ask you to make some citations to your article and articles of other authors published in our journal during the last 3 years in other Web of Science and Scopus indexed journals. This is very important and it will help you and our journal to be more recognized in the scientific and researcher community, increase the journal metrics SJR and impact factors, and also the quartile of the journal.
