Title and Abstract

Title Children's Safety Education Model through Child-Friendly Games

Abstract Children are vulnerable to potential hazards from their environment because of their cognitive, psychological and social developments are in immature stages. Formal education is still lacking in teaching safety concepts for children, hence a fun educational media for children is needed so that children can learn through child-friendly educative games. Because of that develop a fun child safety education model is important to

IAKMI (The Indonesian Public Health Association) is an independent professional organization for the betterment of public health, based on Pancasila based on the 1945 Constitution. Mu Agreement No: 402/UN.37.1.6/IKMI/

Jejaring Nasional Pendidikan Kesehatan (JNPK)

JNPK is an organization that gathers experts and observers in the field of health education, which was established on September 1, 2014. The founder of this organization is the University of Teacher Training Education Institut Teknologi Sepuluh Nopember (ITS) which organizes public health education, namely Universitas Negeri

improve children's knowledge on the importance of safety, so that children can easily understand how to implement safety values in their life. We used Research and Development (R&D) level 1 design to develop children's safety education game, which consisted of five stages, started from the data collection up to assess the product effectiveness. The result was a "snake and ladders of safety" game as safety education media for children. We presented 12 pictures in "snake and ladders of safety" game. This research was conducted on year 2017. Based on the game evaluation, the highest average pretest score was 37.9 and the average posttest score increased to 65.5, hence there was an increase of knowledge on safety by 73.1%. It can be concluded that this game can increase children's knowledge on safety.
