Preface

We are delighted to introduce the proceedings of the fifth edition of the International conference on Science, Education, and Technology (ISET 2019).

The 5th International Conference on Science, Education and Technology (ISET 2019) was held in Semarang, Central Java, Indonesia on June 29th, 2019. ISET 2019 is dedicated to promote acceleration of scientific, technological innovation and the utilization of technology in assisting pedagogical process. Therefore, researchers from various areas in science, education, and technology are invited to present their new findings from their latest works. The annual international was organized by Graduate School of Universitas Negeri Semarang. The conference consisted of plenary sessions and parallel sessions which covers the following topics: Biology, Chemistry and Material Science, Environment, Human Ecology, Green Technology Engineering, Mathematics, Applied Mathematics, Statistics, Computer Science, Natural Science, Physics Education, Physics, Instrumentation and Energy, Technology Assisted Pedagogy. The plenary sessions were held in two sessions in which three keynote speakers from four countries shared their valuable knowledge and researches. We would like to thank to Graduate School of Universitas Negeri Semarang for the financial support in organizing this conference.

There are 266 presenters with the total 917 participants in the 5th International Conference on Science, Education and Technology.

Our most sincere gratitude also goes to the Editors and Reviewers for their help and suggestion in compiling the papers. We would also like to express our appreciation to all presenters and participants for their contribution in this valuable event.

Contents

3D Augmented Reality Mobile Application as an Innovative Instructional Media <i>Virgiawan Adi Kristianto, Harijadi Gunawan Buntoro Wahjono</i>	1
13 Effectiveness of Project-based Learning Model to Improve Students' Cognitive Skills <i>Iman Hermanto, Sarwi Sarwi, Amin Yusuf</i>	8
Quality of Thesis Research Instruments of Mathematical Education Program Students, Unnes Postgraduate <i>Kartono Kartono, Budi Waluya</i>	15
43 Analysis of student needs in writing French languages elementary levels based on blended learning in disruption era <i>Dwi Astuti, Subyantoro Subyantoro, Ida Zulaeha, Astini Su'udi, Novi Kurniawati</i>	20
Time Management As A Means Of Achievement Of Program On Time Graduation In The Program Doctoral Universitas Negeri Semarang <i>Soegiyanto Soegiyanto, Ipang Setiawan</i>	29
Post-Training Evaluation on the Training of Basic Obstetric and Neonatal Emergency Service Training <i>Eva Kartikasari, Siti Nurchasanah, Wardoyo Wardoyo</i>	36
Bibliocounseling To Enhance Resilience Of Bullying Victims Students At Junior High School In Nganjuk, East Java <i>Esty Rokhyani, Sugiyo Sugiyo, Samsudi Samsudi, Edi Purwanto</i>	45
Development of Materials Learning Based on ICT and Scientific Approach 5th Grade of Elementary School <i>Ravita Deasy Rahmawati, Wiwi Isnaeni, Yuli Utanto</i>	52
33 Effectiveness of Activated Carbon from Cassava Peel Waste to Reduce TSS (Total Solid Suspended) Levels in Batik Liquid Waste <i>Niken Tri Widayati, Sulhadi Sulhadi, Teguh Darsono</i>	59
Role of the Village Administration in the Preparation of the Village Budget Management (APBDes) in the Siwalan District at Pekalongan, Central Java <i>Sugino Sugino, Fathur Rokhman, Suwito Eko Pramono, Ety Soesilowati</i>	65
The Developing Model of Academic Supervision Based on quality at MTsN Brebes Central Java Indonesia <i>Kasturi Kasturi, Masrukhi Masrukhi, Rusdarti Rusdarti, Joko Sutarto</i>	70
The Relationship between Assistance in Taking Anti Tuberculosis Drugs and Sputum Check-ups to Compliance of TB Treatment <i>Sri Ratna Rahayu, Nilna Sa'adatar Rohmah, Aufiena Nur Ayu Merzistya</i>	78
The Conservation Values Integration Model in Scientific Approach of Civics in College <i>Ruhadi Ruhadi, Didi Pramono, Asep Purwo Yudi Utomo, Isnarto Isnarto</i>	86

The Evaluation of Mathematical Teacher Ability In Defining The Minimum Completeness Criteria Using The Google Form <i>Estu Subekti, Ani Rusilowati, Muhammad Khumaedi</i>	96
An Analysis Of Social Skills In The Problem Based Learning Model Reviewed From The Cognitive Style <i>Ade Bagus Primadoni, Erni Suharini, Mulyono Mulyono</i>	102
Development of Kinetic Friction Coefficient Experiment Tools Based on Arduino Nano ATmega 328P LDR Sensor <i>Candra Dewi, Millati Azka, Hartono Hartono, Supriyadi Supriyadi</i>	107
Developing Blended Learning Schoology To Enhance Scientific Communication Abilities For Digital Natives Generation <i>Litasari Aldila Aribowo, Bambang Subali, Sigit Saptono</i>	113
A Suitability Of Competency Certification Scheme For Automotive Vocational High School With LSP P1 Against Business and Industrial World Needs In Semarang City <i>Dhewa Frovihandika, Zainal Arifin, Eva Widiastuti</i>	119
Illustration Artworks of Hijabographic: Visual Expressions in Virtual Learning Community <i>Rahina Nugrahani, Tjetjep Rohendi Rohidi, Triyanto Triyanto, Muhammad Ibban Syarif</i>	128
Character-Based Tactical Learning Model for Strengthening Characters in Sports Physical Education (PJOK) of 5th Graders Elementary Schools <i>Isa Ansori, Purnomo Purnomo, Sutaryono Sutaryono, Novi Setyasto</i>	136
The Development Of Supplementary Books Producing Explanatory Text And Procedure Text With Entrepreneurial Content For Vocational School Student <i>Yustinah Yustinah, Fathur Rokhman, Subyantoro Subyantoro, Ida Zulaeha</i>	146
Evaluation of Quality Early Childhood Education Program Services Using CIPP Model <i>Utsman Utsman, Fakhruddin Fakhruddin, Bagus Kisworo</i>	156
The Effectiveness of Web Centric Course for Redox Material in Chemistry Learning <i>Tri Joko Raharjo, Imam Shofwan, Harianingsih Harianingsih, Didik Widiyono, Wijianto Wijianto</i>	166
Contribution of Leg Muscle Power, Leg Flexibility and Balance to Kedeng Smash Ability Sepaktakraw Game <i>Sulaiman Sulaiman, Taufik Hidayah, Muhamad Azwan</i>	174
Determinants Of Whistleblowing Intention: Implementation Of The Theory Of Planned Behaviour with Organizational Support as Moderating <i>Sukirman Sukirman, Fakhruddin Fakhruddin, Haryono Haryono, Heri Yanto</i>	179
Predictions of Social Support on School Counselors' Performances <i>Suharso Suharso, Sugiyo Sugiyo, Rusdarti Rusdarti</i>	189
Analysis of Logical-Mathematical Intelligence Profile on Application of Problem-Based Learning on Acid-Base <i>Sri Wardani, Laras Kurniawati</i>	194

Performance Of Badan Permusyawaratan Desa (BPD) Reviewed From Education Level And Public Figure Status <i>Amin Yusuf, Tri Joko Raharjo, Bagus Kisworo, Yudi Siswanto</i>	202
Analyzing the Determinants of Disclosures of Sustainability Report on LQ45 Companies <i>Muhammad Khafid, Niswah Baroroh, Tusyanah Tusyanah, Vivi Ayuning Tyas</i>	212
⁶⁸ Managerial Performance Improvement Through Budget Participation With Moderation Variables In Public Companies <i>Kusmuriyanto Kusmuriyanto, Achmad Slamet, Trijoko Raharjo, Heri Yanto</i>	220
⁶ The Imagery In Perihal Genid Poetry Book By Sapardi Djoko Damono And Its Application As Drilling Material For Literature Learning In High School <i>Krisna Wijayakusuma, Teguh Supriyanto, Mukh Doyin</i>	231
⁷⁰ Klaten Traditional Lurik Weaving: Adaptation Strategies and Inheritance Systems in Society <i>Ismadi Ismadi, Tjetjep Rohendi Rohidi, Triyanto Triyanto</i>	237
²³ Character Building For Early Childhood: A Case Study for the Teaching of Performing and Fine Arts <i>Hartono Hartono, Yovita Sari</i>	244
Reinforcing Character Education and Nationalism among the Students in Indonesian School of Jeddah with Android-Based MIC (Multimedia Indonesian Culture) and Flipped Classroom Method <i>Fakhrudin Fakhrudin, Farid Ahmadi, Sugiyono Sugiyono, Muhammad Dasril, Ryni Vanditta</i>	248
³⁵ Monitoring and Evaluation Model of Academic Lecturer Performance in Otorhinolaryngology and Head Neck Surgery's Specialist Medical Education Program <i>Muyassaroh Muyassaroh, Samsudi Samsudi, Suwito Eko Pramono, Endang Kustiowati</i>	257
²¹ User Expectations Against Management of the Education Management Masters Program Postgraduate Universitas Negeri Semarang <i>Titi Prihatin, Ghanis Putra Widhanarto, Basuki Sulistio</i>	263
²¹ The Influence of Learning Coding Interest on Learning Outcomes of Web Programming and Mobile Devices Subjects <i>Zahrotun Nafidah, Ghanis Putra Widhanarto</i>	270
Teachers' Scaffolding Talk in Bilingual Class <i>Lulu April Farida</i>	281
⁵ The Use of Aggregation Pheromone for Monitoring <i>Oryctes rhinoceros</i> Population <i>Dyah Rini Indriyanti, Jeni Eka Lutfiana, Priyantini Widiyaningrum, Ning Setiati</i>	287
Parikan Kentrung Blora: A Javanese Pantoum Variation <i>Agus Yuwono, Rustono Rustono, Hari Bakti Mardikantoro, Teguh Supriyanto</i>	292
A Study of Compliment Responses Used by Indonesians <i>Intan Permata Hapsari</i>	298

10	Cultural Acculturation Values in The Minaret of Kudus to Foster Harmony Through Social Studies Education	307
	<i>R Suharso, Wasino Wasino, Dewi Liesnoor Setyowati, Cahyo Budi Utomo</i>	
	Developing Mobile-Based "Blended Learning System" In Order To Improve The Learning Quality Of FIP UNNES In 4.0 Industry Revolution Student	314
	<i>Farid Achmadi, Achmad Rifai RC, Bagus Kisworo, Akaat Hasjiandito, Sony Zulfikasari, Hendra Dedi Kriswanto</i>	
16	Effects Of Working Environment And Motivation On The Employees' Performance In Enhancing The Quality Of Education In Malahayati Maritime Education And Training Center Of Aceh	319
	<i>Rafiqa Alfi Sari, Yusrizal Yusrizal, Nasir Usman</i>

Preservation of Javanese Cultural Values Through Conservation Education Course (A Study on the Students of Faculty of Education Passed Conservation Education Course)

Ilyas¹, Sawa Suryana², Muallim³
Ilyas.pnf@mail.unnes.ac.id¹

Universitas Negeri Semarang¹

Abstract. This study aims at investigating internalization of Javanese cultural values, acculturation strategy, and critical role of educational institution in maintaining and preserving Javanese cultural values. The subject of this study consisted of six students of Universitas Negeri Semarang who have passed conservation education course. This study used qualitative approach conducted through interview and observation. The result of this study showed that the students still maintain, preserve, and utilize Javanese cultural values. They use integration as acculturation strategy between Javanese and global values. In addition, the result amplifies the evaluation that conservation education in Universitas Negeri Semarang generally can be considered successful despite shortage in several aspects.

Keywords: conservation education, acculturation strategy, integration, Javanese culture, global culture

1 Introduction

Acculturation between culture and its dynamics is inevitable. The acculturation process prompts integration, assimilation, separation, or isolation (Berry, Poortiga, Segall, and Marshall, 2002)¹. Similarly, in the context of Javanese culture, acculturation between Javanese culture and foreign one cannot be avoided. And it provokes impacts on every culture.

Modern culture wave with its industrial revolution becomes main color in global culture. The cultural movement develops beyond continents – from Europe-America to African and Asian countries, assimilating different culture. The movement is then widely known as globalization. In this context, global culture intersects national culture and wields its influence in Indonesia, especially in Java.

In the Javanese context, modern cultural influence can be easily found. Javanese people are nowadays familiar with modern technology. Moreover, modern science is also taught in educational institution, especially university. English as international language is also widely

Berry, J. W., & Dasen, Y. H. P. marshall H. S. P. R. (2002). Cross-cultural psychology: Research and applications. In *Journal of Social and Evolutionary Systems* (Second Ed.). (2002).

taught in classroom and mastered by Javanese people (Zentz, 2015)². A large number of expatriates can also be found in Indonesia, particularly in big cities and provinces in Indonesia such as Bali. It shows that there is integration between Javanese culture and modern one. If it does not happen, it seems impossible to find Wayang (traditional puppet) in animated version (Prasetyo and Alamin, 2018)³, Javanese-European architecture in Pura Mangkunegara (Pebrianti, 2019)⁴, or Tayub dance as a part of tourism industry in Indonesia (Noordiana Juwariyah and Inda, 2017)⁵.

The reactions commonly emerge in the area of value differences between modern and local culture which is inherited from one generation to another and becomes main part of Javanese culture – values such as tolerance, friendship, mutual cooperation, and their various derivative practices in social context, (Jandra, Djamil, Salamon, Ansyory, Zein, 2015; Affan dan Maksum, 2016)⁷. In Javanese culture, for instance, attitude (*unggah – ungguh*) in language use has central cultural role. For Javanese people it is not ethical to speak *Ngoko* Javanese (less-polite variety of language) to the older or respected people. *Kromo madyo* or *kromo inggil* (more polite variety of language) is considered more ethical and aesthetic instead.

In modern perspective, different use of language variety for people of different ages is often regarded as feudalism practice (Izzah and Salikin, 2016)⁸, and it is due to different social classes between the communicants and communicators (Winarti, 2018)⁹. In this point, assimilation between two cultures is likely to occur because of the differences. In Javanese culture, the use of *ngoko*, *kromo*, *madyo*, and *kromo inggil* is not considered as feudalism practice, yet it shows attitude of Javanese people to respect to the older or respected ones (Fernandez, 2008)¹⁰.

The phenomenon of cultural assimilation is generally experienced by young generation (late adolescence and early adulthood). Young generations, who are on average 18-22 (late adolescence), are generally students. Thus, the phases of internalizing the values of local culture also become the campus' responsibility as a place to study (besides family and society of course)

(Ward and Geeraert, 2016)¹¹. According to the writers' observations, several campuses have understood the negative potential of foreign cultures, and have prepared various strategies to 'secure' their students from these negative influences. In addition, it aims at equipping students with noble values of the archipelago's cultural heritage.

One of the universities that has such program is Universitas Negeri Semarang (UNNES). As a conservation university, UNNES has carried out various strategic steps to conserve noble values of Javanese culture in Tri Dharma of Higher Education. One form of this policy is to organize courses in character education and conservation education. In these courses all academic activities of UNNES must refer to the principles of conservation: protection, preservation and sustainable use. Outcome of the course, students are expected to be virtuous and noble persons, and be able to address the use of natural resources, art and cultural human resources wisely. However, the strategic point of concern for the writers is how the values of Javanese culture values is preserved by the students who have passed these courses. Ideally, students who have passed conservation education course have more experience on the cultural values of the archipelago's heritage than those who have not. However, it is empirically necessary to prove it further.

Based on the background above and considering the strategic and important location of the issue, the writers are interested in conducting research with the title 'Preservation of Javanese Cultural Values through Conservation Education Course (A Study on the Students of Faculty of Education who have Passed Conservation Education Course)

2 Research Methodology

This study used qualitative approach referring to research problems addressed in this study, which consist of efforts to preserve Javanese cultural values through conservation education course for students who have passed that course in the Faculty of Education, UNNES. The subjects of this study were 6 Javanese students of Faculty of Education UNNES, and they have passed conservation education course.

Since the point of this study is preserving Javanese cultural values, the data in this study was primary and secondary data. The primary data was obtained directly from the students of Faculty of Education who have passed conservation education course. The secondary data, meanwhile, was collected from literature review.

In order to get the answers on the preservation efforts of Javanese cultural values in the university, the qualitative data is proceeded into three stages: reduction, presentation, and drawing conclusion. Data analysis in this study is explained descriptively.

3 Results and Discussion

The interview with the subjects of this study shows the following results. Some values of Javanese culture preserved by the students who have passed conservation education course consist of belief, trust, hope, patience, and harmony. Javanese culture really maintains relationship with God. Beliefs are always passed down to grandchildren – the society believes

24

¹¹ Ward, C., & Geeraert, N. Advancing acculturation theory and research: The acculturation process in its ecological context. *Current Opinion in Psychology*, 8(April), pp. 98–104. (2016).

that everything depends on God's will. People as the servants must comply with God's commands. The most prominent attitude in values of Javanese culture is to maintain the trust of others, they maintain mutual trust in agreement, in campus life. From the observation result, it is showed that they maintain mutual trust both in small and big agreements. They believe that if they do not obey the agreement there will be bad consequences. All humans must have hopes, and dreams cannot be reached without effort. However, effort is not enough. Every action must be accompanied by prayer so that it can succeed. Actions also need to be accompanied by strong determination. With all of those, success can be easily achieved. The definition of patience in Javanese culture is described with three things, lilo, nrimo, patience. They accept what they get such as college problem, for example: getting low score. In terms of friendship on campus they can accept their friends even if they do not agree. It is showed by the way they still build good social relationship. In addition, they can accept any condition in the campus even though it bad thing happens. Then, they try to change from bad thing to good one. It was proved when they receive final score that possibly is out of expectation. Firstly, they feel hard to accept it, but slowly they can accept it. As they still learn, they frequently still have unstable emotions, but it seems normal. Every individual tries to maintain relationships with friends in the campus and boarding house. They can have a harmonious relationship when they are tied to a particular department or institution. It means the ability to align themselves is only at the stage when they are still in an institutional bond. Thus, harmonious relationship can only be achieved with a friend in one department and class. But the harmony can also be realized in a small or personal. They still maintain good relationship with friends even though they are not in the same department. They can understand different ethnics and religions.

There are also some efforts in preserving values of Javanese culture such as preserving, maintaining, and developing. Five out of six student who have passed conservation education course always maintain spiritual values by actively doing worship (compulsory prayers 5 times a day). The prayer is always done either in campus or boarding house. The interview with SS revealed that he does prayer because he wants to maintain relationship with God so that it remains interwoven. Because by maintaining relationship with God, his prayer will be granted. Four out of six research subjects always tried to practice the values of ritual worship. It can be seen in social relations every day when they always hold the trust that has been given from their peers. They also try to practice religious values to the most basic stage. Their family relationships are also intertwined. It is proved by getting to know each other's name and their address. Even they sometimes visit each other. This is done so that family relationship can be maintained. Four out of five research subjects develop values of Javanese culture by encouraging their classmates to pray, but, they do not force them. It is showed when they hear the prayer call. Within social relationship, they can help their friends when they face difficulties. They try to motivate them so that they can stay strong.

In globalization era, people can be unconsciously degraded if they are not careful. This does not only happen to general public but also to university, which is be able to produce a new generation that is more productive, innovative, creative. However, it sometimes fails to achieve that goal. We can see this failure when college people no longer understand and apply eastern culture, especially Javanese culture. From the results of observations for students who are still able to practice Javanese cultural values in their daily lives both on campus and off campus, they are more mature than others. This can be seen by the indication that they rarely leave compulsory worship, either prayer or fasting. If they are on campus, they will immediately carry out prayers and must be congregated if they hear prayer call. This means that even though they have not been monitored by their parents, they can still understand which ones are obligatory and which are not. Sometimes, students coming from a good family lose their control in the

campus. They rarely do prayer, or even some do not want to pray because they are no longer under parents' control. Globalization as a cultural movement with a variety of features has assimilated various culture, including Javanese. The research subjects in this study also live and grow in the globalization era. As Javanese who live in the global era, all of the subjects showed positive attitudes towards globalization. These attitudes can be seen from the observation carried out by the researcher. Globalization products seem to have become part of the daily subject. They use smart phone, laptop, motorcycle, and other modern equipment, and most of which are imported products. They also study modern western sciences such as digital information systems, educational technology, English, and so on. In addition, the subjects of this study also like to wear jeans.

As part of a society that lives in a global era, it is impossible for the subjects to reject or even separate themselves from the influence of globalization. The assimilation between global and local culture is inevitable and will lead to massive acculturation processes. As Javanese ethnic who shows positive attitudes towards globalization, acculturation process occurs within each subject.

Based on the results of the study, it can be drawn understanding that the respondents still adhere to the values of Javanese culture. It can be seen from their belief in God Almighty, trusting and maintaining trust in others, relying on God, patience in facing difficulties, maintaining harmony horizontally (social, environmental) and vertical (spiritual). They also maintain, preserve, and develop the values of Javanese culture. The subjects of this study also preserve the values of Javanese culture, meaning that they keep these values from fading away by maintaining confidence in God Almighty and carrying out rituals of worship (personal dimensions). In terms of preserving the values, the subjects show efforts to maintain the values by establishing and maintaining friendship. The subjects also contribute to development of the values by helping to invite their friends to worship, to give enthusiasm, and to share. In addition, they are also actively involved in attending cultural seminars.

4 Conclusions

The results of this study lead to several conclusions as follows. Regarding the values of Javanese culture in the subjects of this study, the students still firmly hold the values of Javanese culture. The values of Javanese culture still hold by the students are belief in God, in the form of actively carrying out obligatory prayers and hard work. The attitudes of *lilo* and *nrimo* are still being hold. However, patience still needs to be improved. In terms of maintaining harmony relationships, it is still limited to the group's emotional. The efforts made by the students in preserving the values of Javanese culture are maintaining compulsory worship and trying to implement the values of Javanese culture in real life, gaining knowledge, understanding Javanese culture by coming to several cultural gathering and seminars. The values of Javanese culture make the students calmer and feel that they can be accepted when they interact with their surrounding (in campus or boarding house). Thus, they become dignified individuals.

The students apply integration as their cultural strategy. Integration refers to an integration between Javanese culture and global culture. Javanese culture is placed as a core culture in the form of unity of values of Javanese culture (conclusions point 1). Global culture is placed as a surface structure for example in the form of mastery of technology and fashion style. Such strategy can be understood because the subjects try to be adaptive to global challenges but at the same time try to maintain Javanese cultural identity and values within themselves. The strength

of the subject in maintaining the values of Javanese culture is the result of character education and conservation education. However, the results of conservation education are far from complete.
