IMPORTANT!!
=====

For ORIGINAL/RESEARCH PAPER: the paper should be presented with IMRaD model:

1. Introduction
2. Research Method
3. Results and Discussion
4. Conclusion.

We will usually expect a minimum of 30 references primarily to journal papers. Citations of textbooks should be used very rarely and citations to web pages should be avoided. All cited papers must be referenced within the body text of the manuscript.

For REVIEW PAPER: the paper should present a critical and constructive analysis of existing published literature in a field, through summary, classification, analysis and comparison. The function and goal of the review paper is:

- 1) to organize literature;
- 2) to evaluate literature;
- 3) to identify patterns and trends in the literature;
- 4) to synthesize literature; or
- 5) to identify research gaps and recommend new research areas.

The structure of a review paper includes:

1. Title – in this case does not indicate that it is a review article.
2. Abstract – includes a description of subjects covered.
3. Introduction includes a description of context (paragraph 1-3), motivation for review (paragraph 4, sentence 1) and defines the focus (paragraph 4, sentences 2-3)
4. Body – structured by headings and subheadings
5. Conclusion – states the implications of the findings and an identifies possible new research fields

Number of minimum references for review paper is 50 references (included minimum 40 recently journal articles).

In preparing your revised paper, you should pay attention to:

1. Please ensure that: all references have been cited in your text; Each citation should be written in the order of appearance in the text; The citations must be presented in numbering and CITATION ORDER is SEQUENTIAL

[1], [2], [3], [4],

Please download & study our published papers for your references:

(Please use “Search” menu under "JOURNAL CONTENT" menu in right side of

the site)

2 An Introduction should contain the following three (3) parts:

- Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the art of the field the report is about.
- The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.
- The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 5 references (recently journal articles) are cited in this section.

3. Results and discussion section: The presentation of results should be simple and straightforward in style. This section report the most important findings, including results of statistical analyses as appropriate. You should present the comparison between performance of your approach and other researches. Results given in figures should not be repeated in tables. It is very important to prove that your manuscript has a significant value and not trivial.

Update your metadata in our online system when you submit your revised paper

through our online system, included:

- Authors name are presented without salutation
- Authors Name are presented Title Case (ex: Michael Lankan, and NOT written--> michael lankan or MICHAEL LANKAN). Add all authors of your paper as per your revised paper
- Title of revised paper (ex: Application of space vector , NOT --> APPLICATION OF SPACE VECTOR)
- Content of updated abstract

The goal of your revised paper is to describe novel technical results.

A high quality paper MUST has:
(1) a clear statement of the problem the paper is addressing --> explain in "Introduction" section
(2) the proposed solution(s)/method(s)/approach(es)/framework(s)/
(3) results achieved. It describes clearly what has been done before on the problem, and what is new.

Please submit your revised paper within 6 weeks.

I look forward for hearing from you

Thank you

 This is an interesting study and good issue discussed. The paper is well written, structured and easy to understand the contents. In my opinion, the paper has some shortcomings such listed below:

1. It is better to state the problem statement in Abstract.
2. It is suggested to explain in detail the process of grouping the subjects into all three groups or just explain the criteria of Field Department.
3. The authors are recommended to justify the sufficiency number of subject (5) whether it was good enough to represent the Field Department and support the findings or you can add some literature review regarding to the sample size used.

7. Artikel Publik di *International Journal of Evaluation and Research in Education (IJERE)*

The screenshot displays the website for the International Journal of Evaluation and Research in Education (IJERE). The browser's address bar shows the URL <https://ijere.iaescore.com/index.php/IJERE/article/view/22399>. The journal's logo, 'iaes', is prominently displayed at the top left, with the full name 'International Journal of Evaluation and Research In Education (IJERE)' below it. The journal's ISSN (2252-8822) and e-ISSN (2620-5440) are also visible. On the right side of the header, there are several accreditation and quality indicators: a Scopus 2.1 logo, a Q3 ranking for the year 2022 with a score of 0.308, and an HRP 2022 score of 0.821. The 'Intelektual Pustaka Media Utama' logo is also present. A navigation menu includes links for HOME, ABOUT, USER HOME, SEARCH, CURRENT, ARCHIVES, and ANNOUNCEMENTS. The article title is 'The spatial thinking process of the field-dependent students in reconstructing the geometrical concept', authored by Henry Suryo Bintoro, Yohanes Leonardus Sukestiyarno, Mulyono Mulyono, and Walid Walid. The abstract discusses the spatial thinking process and the use of the Action-Process-Object-Schema (APOS) theory. On the right side of the page, there are three utility boxes: 'USER' (showing the user is logged in as henrysuryo with options for My Profile and Log Out), 'CITATION ANALYSIS' (listing sources like Google Scholar, Scholar Metrics, Scinapse, Scopus, ERIC, and Web of Science), and 'QUICK LINKS' (providing shortcuts to Author Guideline, Editorial Boards, Online Submissions, Abstracting and Indexing, Publication Ethics, Visitor Statistics, and Contact Us). At the bottom of the page, a 'JOURNAL CONTENT' section is partially visible. The Windows taskbar at the very bottom shows the system tray with a temperature of 27°C, a search bar, and the date 07/07/2023 at 9:35.
