1. Bukti Submit Paper melalui OJS (12 Juni 2023)

2. Feedback Pertama Dari Editor (18 September 2023)

Dear author,

Thank you for contributing your paper to INTERNATIONAL JOURNAL OF SUSTAINABLE DEVELOPMENT AND PLANNING!

- Please revise your paper according to the attached comments.
- Highlight the revised parts in the final version of your paper and give a response according to review comments.
- Please typeset your paper according to template.
- Please reduce the plagiarism detection rate of the article.

To ensure fast publication of your paper, please return your revised manuscript and answers to all queries to this email **within 14 days**. Thus, we have enough time to process your manuscript in the next step. For further assistance, please do not hesitate to contact us via this email.

We would like to take this opportunity to thank you for choosing *International Journal of Sustainable Development and Planning* as your publishing medium and hope that we will receive further submissions from you or your scholar friends in the future.

Best regards,

IISDP Editorial Board
International Journal of Sustainable Development and Planning

International Information and Engineering Technology Association (IIE TA)
<http://www.iieda.org/>

REVIEWER'S COMMENTS

Title, abstract, and keywords:

1. **Title Evaluation:** The title is informative and clearly indicates the research's focus on the empowerment of rural Micro, Small, and Medium Enterprises (MSMEs). However, it could be slightly rephrased for better readability and clarity. A potential alternative could be "Strengthening Tourist Village Attractions through Empowerment of Rural Micro, Small, and Medium Enterprises (MSMEs)".
2. **Abstract Clarity:** The abstract provides an overview of the research objectives, methods, and key findings. However, the text could be better structured for clarity. For instance, it would be more reader-friendly to have clear separation between the research objectives, methods, and findings.
3. **Detailing Methodology:** The methodology section within the abstract could use more details. For example, how many focus groups were conducted? How was the Delphi method utilized? This would give readers a better understanding of how the research was conducted.
4. **Clarifying Findings:** While the findings are discussed, the abstract could benefit from a clearer explanation. For example, how significant was the increase in income for the MSME owners and the increase in tourists' interest?
5. **Engaging Conclusion:** The conclusion drawn in the abstract is quite general. It would be beneficial to end with a powerful statement summarizing the most significant findings or implications of the research.
6. **Keywords Evaluation:** The keywords chosen are broad and relevant to the research. However, consider including specific keywords related to the context of the research, such as "rural development", "sustainable tourism", "economic performance", or "Central Java".

Introduction:

1. **Language and Grammar:** The introduction could benefit from a grammar and language review to ensure that all sentences are clear and well-structured. For example, "At the early of 2016 the poverty in rural areas reached 14.11 percent and in urban areas 7.79 percent." could be rephrased as "In early 2016, the poverty rate reached 14.11 percent in rural areas and 7.79 percent in urban areas."
2. **Transitions and Flow:** The transitions between different ideas could be smoother. For example, the transition from discussing poverty and inequality to the potential of tourism might benefit from a more explicit connection or bridge.
3. **Research Gap:** While the introduction does a good job of setting the stage for the research, it could benefit from a clearer statement of the research gap that this study aims to address. Towards the end of the introduction, it would be helpful to have a paragraph that succinctly states what the existing literature lacks and how this study intends to fill that gap.
4. **Research Questions/Hypothesis:** The introduction could explicitly present the research questions or hypotheses. This could be included in the same paragraph addressing the research gap.

Method:

1. **Data Collection:** The data collection process is explained well. However, it could be beneficial to further explain how observations were conducted and how data from these

- observations was recorded and analyzed.
2. **Delphi Method:** The explanation of the Delphi method is clear. However, it might be helpful to further detail how it was specifically applied in your study — for instance, how feedback rounds were conducted, how consensus was determined, and how the outcomes were analyzed.
 3. **Research Site:** It's good that you've mentioned the specific tourist village where your study was conducted. However, a brief introduction of the site (Candirejo Tourist Village, Magelang) providing context on its relevance to your study would be helpful.

Result and discussion:

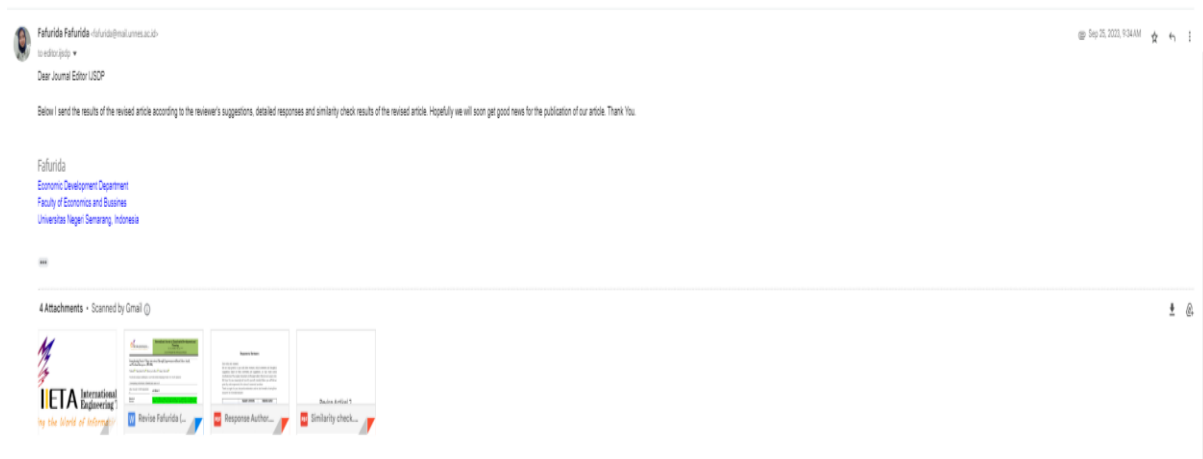

1. **Argument Structure:** You've presented a strong argument supporting the effectiveness of community-based tourism and MSME involvement. The flow of the argument is generally coherent, but be careful to avoid redundancy. For instance, the sentence "Improving the economy of rural communities can be carried out by actively involving the community in managing tourist villages by utilizing the existing potential such as MSMEs" seems to be repeated with minor variations.
2. **Contextual References:** The referenced studies and regulations add credibility to your argument. However, it would be helpful if you could provide a few more details about the referenced studies and how they support your argument (especially the studies conducted by Škufli, Giannakis, and others).
3. **Specific Examples:** The specific example of Candirejo Tourist Village strengthens your argument. It might be beneficial to provide more explicit data or specific instances demonstrating how MSMEs have improved the village economy.
4. **Impacts Quantification:** You mention a 120% income increase for partnering communities in Candirejo Tourist Village. More information about how this figure was measured and over what time period would be useful.

Conclusion:

1. **Reiteration of Key Findings:** I appreciate that you reiterate your key findings about the positive economic impact of MSMEs in tourist villages, but I would recommend framing these findings with a bit more specificity and context to reinforce the importance of your research.
2. **Implications and Recommendations:** The conclusion could be strengthened by mentioning the implications of your findings for policymakers, practitioners, or future research. If your research suggests specific recommendations for how to better involve MSMEs in rural tourism development, it would be beneficial to include those here.
3. **Grammar and Language:** A language and grammar check could enhance this section. For instance, "an attractions" should be "an attraction".
4. **Future Research:** It might be beneficial to discuss potential avenues for future research based on your study's findings. This could include research into other ways MSMEs can be leveraged to bolster rural tourism, or how these ideas could be applied to different types of rural communities.

Final decision: Major revision

3. Pengiriman Revisi Paper (25 September 2023)

Dear Journal Editor IJSDP

Below I send the results of the revised article according to the reviewer's suggestions, detailed responses and similarity check results of the revised article. Hopefully we will soon get good news for the publication of our article. Thank You.

Response to Reviewers

Dear editor and reviewers:

We are truly grateful to your and other reviewers' critical comments and thoughtful suggestions. Based on these comments and suggestions, we have made careful modifications on the original manuscript. All changes made to the text are in green color. We hope the new manuscript will meet the journal's standard. Below you will find our point-by-point responses to the reviewers' comments/ questions.

Thank you again for your time and consideration, and we look forward to hearing from you soon for a favorable decision.

	Reviewer Comments	Response Author
Title, abstract, and keywords:		
1. Title Evaluation	The title is informative and clearly indicates the research's focus on the empowerment of rural Micro, Small, and Medium Enterprises (MSMEs). However, it could be slightly rephrased for better readability and clarity. A potential alternative could be "Strengthening Tourist Village Attractions through Empowerment of Rural Micro, Small, and Medium Enterprises (MSMEs)".	Thank you for the advice given. The article title has been revised to "Strengthening Tourist Village Attractions through Empowerment of Rural Micro, Small, and Medium Enterprises (MSMEs)".
2. Abstract Clarity	The abstract provides an overview of the research objectives, methods, and key findings. However, the text could be better structured for clarity. For instance, it would be more reader-friendly to have clear separation between the research objectives, methods, and findings.	The abstract writing structure has been improved. The abstract contains the core problems in the research, research objectives, analysis methods and research findings.
3. Detailing Methodology	The methodology section within the abstract could use more details. For example, how many focus groups were conducted? How was the Delphi method utilized? This	The explanation of the methodology in the abstract has been supplemented with an explanation of the use of the Delphi and descriptive qualitative methods. The

	would give readers a better understanding of how the research was conducted.	Delphi method was used to develop a model for empowering MSMEs by involving experts, while qualitative descriptive analysis was used to explain the mechanism for implementing the model.
4. Clarifying Findings	While the findings are discussed, the abstract could benefit from a clearer explanation. For example, how significant was the increase in income for the MSME owners and the increase in tourists' interest?	In the abstract section information has been added that "In Candirejo Tourist Village this model has been implemented and proven to be able to increase the income of partner communities by 120%".
5. Engaging Conclusion	The conclusion drawn in the abstract is quite general. It would be beneficial to end with a powerful statement summarizing the most significant findings or implications of the research.	In the abstract section, the statement has been stated that "The results of implementing the model show that empowering the MSMEs owned by the community as an attraction to be visited by tourists is actually able to significantly increase the income of the owners of MSMEs, and also is able to increase the tourists' interest in visits and length of stay". This is powerful statement summarizing the most significant findings or implications of the research.
6. Keywords Evaluation	The keywords chosen are broad and relevant to the research. However, consider including specific keywords related to the context of the research, such as "rural development", "sustainable tourism", "economic performance", or "Central Java".	Keywords have been updated to : Rural Development, Tourism Villages, Micro, Small and Medium Enterprises (MSMEs), Sustainable Tourism, Economic Performance.

Introduction		
1. Language and Grammar	The introduction could benefit from a grammar and language review to ensure that all sentences are clear and well-structured. For example, "At the early of 2016 the poverty in rural areas reached 14.11 percent and in urban areas 7.79 percent." could be rephrased as "In early 2016, the poverty rate reached 14.11 percent in rural areas and 7.79 percent in urban areas."	Some sentences have been improved.
2. Transitions and Flow	The transitions between different ideas could be smoother. For example, the transition from discussing poverty and inequality to the potential of tourism might benefit from a more explicit connection or bridge.	To make changes in subject matter smoother. The author has added sentences that connect the points of discussion, so that the transition of the points of discussion will be better.
3. Research Gap	While the introduction does a good job of setting the stage for the research, it could benefit from a clearer statement of the research gap that this study aims to address. Towards the end of the introduction, it would be helpful to have a paragraph that succinctly states what the existing literature lacks and how this study intends to fill that gap.	The research gap has been added at the end in the introduction.
4. Research Questions/Hypothesis	The introduction could explicitly present the research questions or hypotheses. This could be included in the same paragraph addressing the research gap.	This research does not have a hypothesis. The aim of this research is to develop a model for empowering MSMEs. The existence of village MSMEs can be used to support the attractiveness of tourist villages. This has been stated in the

		introduction.
Method		
1. Data Collection	The data collection process is explained well. However, it could be beneficial to further explain how observations were conducted and how data from these observations was recorded and analyzed.	It has been explained further in the method section that observations were carried out by direct observation in the field to see how the tourism village activity process was running. Furthermore, the observation results were strengthened by conducting a Focus Group Discussion to strengthen the formation of the model.
2. Delphi Method	The explanation of the Delphi method is clear. However, it might be helpful to further detail how it was specifically applied in your study — for instance, how feedback rounds were conducted, how consensus was determined, and how the outcomes were analyzed.	In the method section, detailed steps for carrying out the Delphi method have been added.
3. Research Site	It's good that you've mentioned the specific tourist village where your study was conducted. However, a brief introduction of the site (Candirejo Tourist Village, Magelang) providing context on its relevance to your study would be helpful.	In the method section it has been explained Candirejo Tourism Village was chosen as the location for implementing the model because this tourist village is one of the best tourist villages in Central Java which applies the concept of sustainable tourism, but in its development the attractiveness of this tourist village is still underdeveloped and requires innovation to increase its attractiveness in order to improve the village's performance.

Result and discussion		
1. Argument Structure	You've presented a strong argument supporting the effectiveness of community-based tourism and MSME involvement. The flow of the argument is generally coherent, but be careful to avoid redundancy. For instance, the sentence "Improving the economy of rural communities can be carried out by actively involving the community in managing tourist villages by utilizing the existing potential such as MSMEs" seems to be repeated with minor variations.	We have tried paraphrasing to convey the same information, but with different sentences.
2.Contextual References	The referenced studies and regulations add credibility to your argument. However, it would be helpful if you could provide a few more details about the referenced studies and how they support your argument (especially the studies conducted by Škufli, Giannakis, and others).	In the discussion of the research results, it was explained that the findings in the research conducted by Skufli and Giannakis have strengthened the evidence that the development of tourist villages is considered to be able to boost the economy of the community in tourist village areas. This is in accordance with the objectives of this research.
3. Specific Examples	The specific example of Candirejo Tourist Village strengthens your argument. It might be beneficial to provide more explicit data or specific instances demonstrating how MSMEs have improved the village economy.	In the discussion section of the research results, it is explained that collaborative partnerships in providing accommodation, tourism activities, local products and culinary between the rural communities and the tourist village managers are proven to be able to increase the income of local villagers. In Candirejo Tourist Village this model has been

		implemented and proven to be able to increase the income of partner communities by 120%.
4. Impacts Quantification	You mention a 120% income increase for partnering communities in Candirejo Tourist Village. More information about how this figure was measured and over what time period would be useful.	In the discussion of the research results it has been explained that the increase in income is measured by the difference in income before the implementation of the MSME empowerment model and after the model is implemented.
Conclusion		
1. Reiteration of Key Findings	I appreciate that you reiterate your key findings about the positive economic impact of MSMEs in tourist villages, but I would recommend framing these findings with a bit more specificity and context to reinforce the importance of your research.	We have tried to write the results of this research in detail by explaining that MSMEs can be an additional attraction that can be visited by tourists and that the involvement of village MSMEs in tourism activities has been proven to be able to increase the income of local village communities.
2. Implications and Recommendations	The conclusion could be strengthened by mentioning the implications of your findings for policymakers, practitioners, or future research. If your research suggests specific recommendations for how to better involve MSMEs in rural tourism development, it would be beneficial to include those here.	Recommendations from the research findings have been added at the end of the conclusion.
3. Grammar and Language	A language and grammar check could enhance this section. For instance, "an attractions" should be "an attraction".	Thank you for the advice given. We have tried to improve the grammar in the article.
4. Future Research	It might be beneficial to discuss potential avenues for future	We have added suggestions for further research to carry

	research based on your study's findings. This could include research into other ways MSMEs can be leveraged to bolster rural tourism, or how these ideas could be applied to different types of rural communities.	out research on tourism village development strategies through other alternatives besides empowering village MSMEs.
--	--	---

Above are the response to reviewers, we hope that these revisions are satisfactory and that the revised version of the manuscript will be acceptable for publication in International Journal of Sustainable Development and Planning.

Thanks for your good advice again.
Best wishes.
Yours sincerely

Fafurida et al.

5. Respon Dari Editor Terhadap Pengiriman Revisi Artikel. Artikel dinyatakan diterima (23 November 2023)

Dear author,

We have reached a decision regarding your submission to *International Journal of Sustainable Development and Planning*,

Manuscript Title: Strengthening Tourist Village Attractions Through Empowerment of Rural Micro, Small, and Medium Enterprises (MSMEs)
 Manuscript ID: 21692

Our decision is to: Accept Submission

Before we proceed with the publication of your article, please complete the arrange payment of your article processing charge (US \$ 500) in 15 days by the following ways:

Please fill in the blank when you complete the payment:

Customer	
Name	
Account number	
Address	
Misc	
Date	
For	IJSDP ID: 21692
Unit Price	USD 500.00
Payment	
USD Remittance Path BENEFICIARY NAME: IIETA-RSMC Beijing LTD ACCOUNT NUMBER: 0200296409116032240	

BENEFICIARY ADDRESS: Room 302, Building 3, Jinmao Plaza, Fengtai District, Beijing, PRC

BENEFICIARY BANKER'S NAME: Industrial and Commercial Bank of China Beijing Municipal Branch, Beijing, PRC

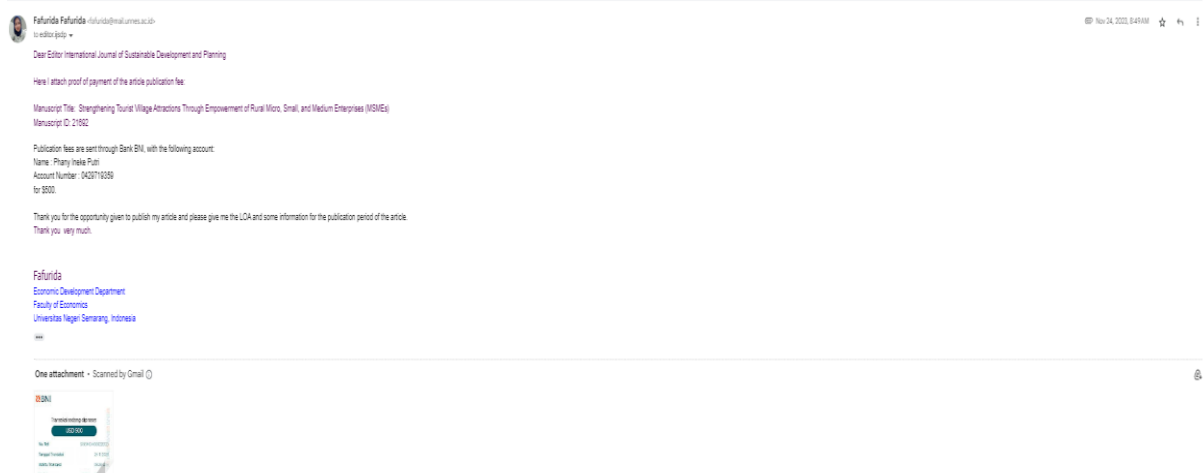

SWIFT CODE: ICBKCNBJBJM

PLEASE :

1. Remark the manuscript ID in the Remittance.
2. Send the remittance receipt or payment screenshot, and name and account number of the remitter to this email.

Total due in 15 days. Overdue accounts subject to a service charge of 1% per month.

6. Pengiriman Bukti Pembayaran (24 November 2023)

Dear Editor International Journal of Sustainable Development and Planning

Here I attach proof of payment of the article publication fee:

Manuscript Title: Strengthening Tourist Village Attractions Through Empowerment of Rural Micro, Small, and Medium Enterprises (MSMEs)

Manuscript ID: 21692

Publication fees are sent through Bank BNI, with the following account:

Name : Phany Ineke Putri

Account Number : 0429719359

for \$500.

Thank you for the opportunity given to publish my article and please give me the LOA and some information for the publication period of the article.

Thank you very much.

Acceptance Letter

International Journal of Sustainable Development and Planning

23 November 2023

Fafurida

Faculty of Economics and Business, Universitas Negeri Semarang, Central Java 50229, Indonesia

Dear Fafurida, Phany Ineke Putri, Prasetyo Ari Bowo, and Shanty Oktavilia,

MS: Strengthening Tourist Village Attractions Through Empowerment of Rural Micro, Small, and Medium Enterprises (MSMEs)

I am pleased to inform you that as per the recommendation of the editorial board, your above-mentioned manuscript has been accepted for publication in International Journal of Sustainable Development and Planning (ISSN 1743-7601). The paper will be published when the administrative procedures are completed for importance.

Please note the following points, and ensure compliance:

- 1) Page Proofs of your paper will also be sent to you for minor corrections and approval.
- 2) Provide us with your E-mail ID for future correspondence.
- 3) Provide complete postal address with correct postal-code.
- 4) The corresponding author would receive a PDF of the published paper.
- 5) If your paper is found with plagiarism content after the release of Acceptance Letter, it will not be published in the Journal.

It is recommended that you cite this and other published works from International Information and Engineering Technology Association (www.iieta.org) in your papers to be published in other journals.

Yours sincerely,

**Date: 23 November 2023
Place: Edmonton, Canada**

Respon Penulis:

Thanks, I have received it. Can I get information for the publication period of my article?
Thank you very much.

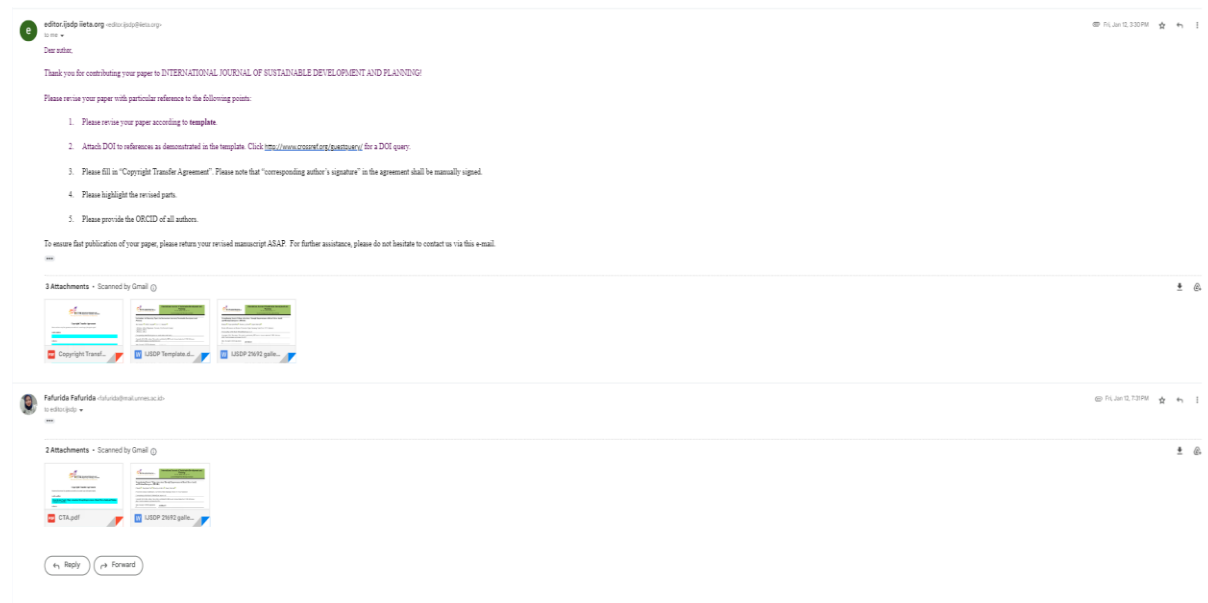

Fafurida
Economic Development Department
Faculty of Economics
Universitas Negeri Semarang, Indonesia

Respon Editor:

Dear author,

Your paper is scheduled to be published in Issue 2~3 in 2024.

8. Permintaan Revisi dari Editor dan Pengiriman Hasil Revisi Kepada Editor (12 Januari 2024)

Dear author,

Thank you for contributing your paper to INTERNATIONAL JOURNAL OF SUSTAINABLE DEVELOPMENT AND PLANNING!

Please revise your paper with particular reference to the following points:

1. Please revise your paper according to template.

2. Attach DOI to references as demonstrated in the template.
Click <http://www.crossref.org/guestquery/> for a DOI query.
3. Please fill in “Copyright Transfer Agreement”. Please note that “corresponding author’s signature” in the agreement shall be manually signed.
4. Please highlight the revised parts.
5. Please provide the ORCID of all authors.

To ensure fast publication of your paper, please return your revised manuscript ASAP. For further assistance, please do not hesitate to contact us via this e-mail.

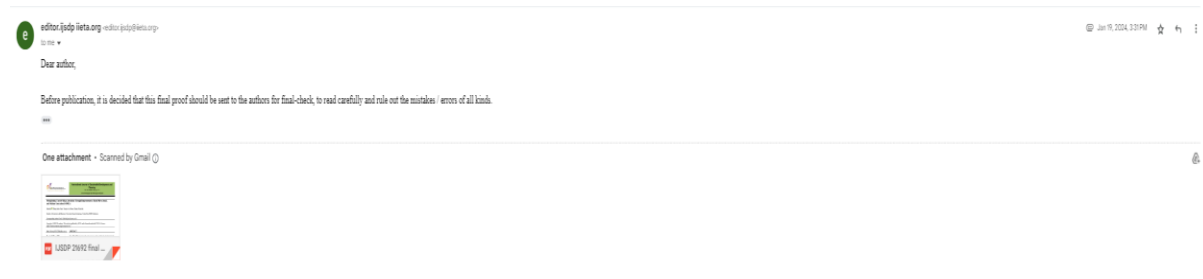

Respon Penulis:

Fafurida Fafurida <fafurida@mail.unnes.ac.id>
to editor.ijstdp

2 Attachments • Scanned by Gmail

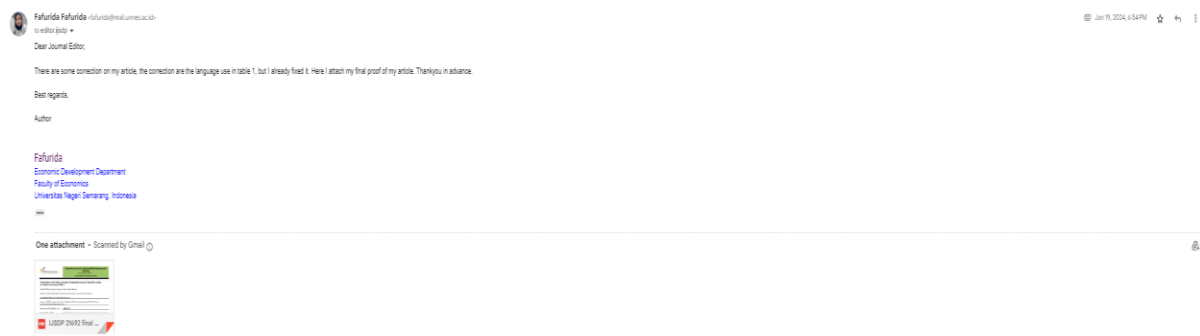

9. Permintaan Final Proof Dari Editor (19 Januari 2024)

Dear author,

Before publication, it is decided that this final proof should be sent to the authors for final-check, to read carefully and rule out the mistakes / errors of all kinds.

10. Pengiriman Respon Tentang Final Prof Kepada Editor (19 Januari 2024)

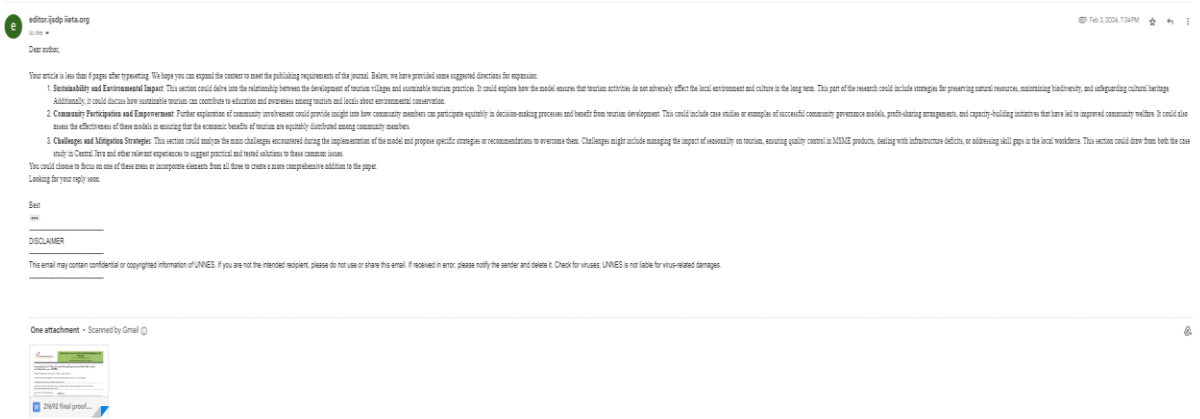

Dear Journal Editor,

There are some correction on my article, the correction are the language use in table 1, but I already fixed it. Here I attach my final proof of my article. Thankyou in advance.

Best regards,

Author
Fafurida
Economic Development Department
Faculty of Economics
Universitas Negeri Semarang, Indonesia

11. Permintaan Revisi Kembali Oleh Editor (3 Februari 2024)

Dear author,

Your article is less than 6 pages after typesetting. We hope you can expand the content to meet the publishing requirements of the journal. Below, we have provided some suggested directions for expansion:

1. **Sustainability and Environmental Impact:** This section could delve into the relationship between the development of tourism villages and sustainable tourism practices. It could explore how the model ensures that tourism activities do not adversely affect the local environment and culture in the long term. This part of the research could include strategies for preserving natural resources, maintaining biodiversity, and safeguarding

cultural heritage. Additionally, it could discuss how sustainable tourism can contribute to education and awareness among tourists and locals about environmental conservation.

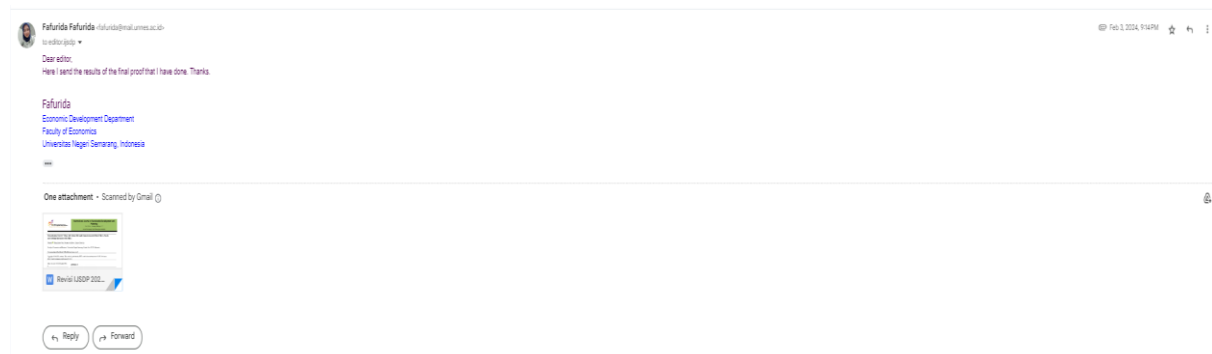

2. **Community Participation and Empowerment:** Further exploration of community involvement could provide insight into how community members can participate equitably in decision-making processes and benefit from tourism development. This could include case studies or examples of successful community governance models, profit-sharing arrangements, and capacity-building initiatives that have led to improved community welfare. It could also assess the effectiveness of these models in ensuring that the economic benefits of tourism are equitably distributed among community members.
3. **Challenges and Mitigation Strategies:** This section could analyze the main challenges encountered during the implementation of the model and propose specific strategies or recommendations to overcome them. Challenges might include managing the impact of seasonality on tourism, ensuring quality control in MSME products, dealing with infrastructure deficits, or addressing skill gaps in the local workforce. This section could draw from both the case study in Central Java and other relevant experiences to suggest practical and tested solutions to these common issues.

You could choose to focus on one of these areas or incorporate elements from all three to create a more comprehensive addition to the paper.

Looking for your reply soon.

Best

12. Pengiriman Hasil revisi (3 Februari 2024)

Dear editor,

Here I send the results of the final proof that I have done. Thanks.
