PERNYATAAN

Dengan ini saya,
Nama : Caisar Alvin Adi Nugroho
NIM : 2201410127
Prodi/ jurusan : Pendidikan bahasa Inggris/ Bahasa Inggris
Fakultas : Bahasa dan Seni Universitas Negeri Semarang
Menyatakan dengan sesungguhnya bahwa skripsi/tugas akhir/final project yang berjudul:

A COMPARATIVE ANALYSIS OF TEACHER-MADE ENGLISH SCHOOL FINAL EXAM OF NINTH GRADERS OF SMP N 17 SEMARANG AND SMP KESATRIAN 2 SEMARANG ACADEMIC YEAR 2013-2014

Yang saya tulis dalam rangka memenuhi salah satu syarat untuk memenuhi gelar sarjana pendidikan bahasa Inggris ini benar – benar merupakan karya saya, yang saya hasilkan setelah melalui penelitian, bimbingan, diskusi dan pemaparan/ujian. Semua kutipan baik yang langsung maupun tidak langsung, atau yang diperoleh dari sumber lainnya, telah disertai keterangan mengenai identitas sumbernya dengan cara sebagaimana yang lazim dalam penulisan karya ilmiah. Dengan demikian, walaupun tim penguji dan pembimbing penulisan skripsi/tugas akhir/final project ini membutuhkan tanda tangan sebagai tanda keabsahaninya, seluruh karya ilmiah ini tetap menjadi tanggung jawab saya sendiri. Jika kemudian terdapat pelanggaran terhadap konvensi penulisan karya ilmiah yang berlaku, saya bersedia menerima akibatnya dan mengadakan perbaikan.

Demikian, pernyataan ini dibuat dengan sebenarnya.

Dedicated to:
My mother, sister, family and
All my friends
ACKNOWLEDGEMENT

First of all, the writer would like to deliver my greatest gratitude to the God the Almighty for the blessing and guidance so that the writer could finish his final project as one of the requirements to finish the study in the English Department of Semarang State University.

The writer also wants to express his gratitude and appreciation to these following people who contribute in the process of completing this final project:

1. My beloved mother, Mrs. Sri Rahayu and my sister, Ms. Christina who always pray for the writer, give their supports and motivations, and help in finishing this final project.
2. Drs. Amir Sisbiyanto, M.Hum., as the advisor of the final project who gave their time to guide, help and advise the writer patiently during the consultations.
3. Mrs. Nursechah, S.Pd, the English teacher of SMP N 17 Semarang who is willing to contribute in the process of finishing this final project.
4. Mrs. Mursitajuni, S.Pd, the English teacher of SMP Kesatrian 2 Semarang who is very kind to allow the writer taking the data of research.
5. All the lecturers of English Department of UNNES who have taught me patiently during the years of my study.
6. All of my friends who give a lot of inspirations and gives contribution in the process of final project completion. Thank you very much

The writer realize that this final project has not been perfect yet. Therefore, the writer would be grateful for comments, suggestions, and corrections to make it better, and hopefully it would be useful for the readers.

Semarang, April 2015

Caisar Alvin A.N.
ABSTRACT

Key words: Item Analysis, Validity, Reliability, Item Facility, Item Discrimination Power, English School Final Exam.

Constructing good language test items is a difficult task. It requires more effort, energy and time, even though the test was made by more than one teacher. There are many competencies that should be fulfilled by a good teacher. One of that is the ability to design or construct a good test. By conducting this study, the writer wanted to find out the quality of the English school final exam for the ninth graders made by teachers in SMP N 17 Semarang and SMP Kesatrian 2 Semarang. The objective of this study was to compare the quality of tests in term of (1) the validity, (2) the reliability, (3) the item facility, and (4) the item discrimination power. The method used in this study was comparative quantitative research. The data were taken from the English school final exam of SMP N 1 and SMP Kesatrian 2 which was administered to the ninth graders students. The writer took 30 students from each school for a sample.

From the result of the data analysis of validity of the test, It can be concluded that both tests were valid in the term of content validity. However, the both test were not valid in the term of criterion validity. In term of reliability, the both test were reliable. From the result of item facility, both test were classified in to an easy test. In the analysis of item discriminating power, the English school final exam of SMP N 17 had satisfactory discrimination. Meanwhile, SMP Kesatrian 2 had poor discrimination. After consulting the Gronlund’s criteria, SMP N 17 has 9 items which still can be used and 14 items which still can be used with several revisions.Meanwhile, SMP Kesatrian 2 has 1 item which still can be used and 4 items which still can be used with several revisions From the result of the analysis, it was found that the quality of both tests were not good enough. However, the English school final exam of SMP N 17 was better than SMP Kesatrian 2.

Based on the finding above, the writer suggested to the teachers to prepare the test items long before it is administered. They should know the characteristic of a good set of test items which includes validity, reliability, item facility, and item discrimination. From the item classification, the items which still can be used should be saved and revised if the teachers want to use it in another test.

CHAPTER I
INTRODUCTION

Chapter one of this study discusses the followings in turns: background of the study, reasons for choosing the topic, statements of the problem, objectives of the study, significance of the study, limitation of the study and the outline of the study. Each of the subchapter discusses the things of which become the basic of why this study is conducted.

1.1 Background of the study

English is very important either in direct communication or interaction. As a means of communication, English has to be mastered actively in oral and also in written. The fast growth of technology claims us to be more proactive in answering global information as asset in fulfilling requirement of market. As an international language, English is not merely as academic requirement but also as global communication media.

   The need of English communication in society is one of the reasons why the Indonesian government has decided to teach English as a compulsory subject in the SMP/SMA. In Indonesia, English is introduced into the curriculum and considered as the first foreign language to be taught at SMP and SMA.

   In an educational process, students or learners are expected to undergo changes. Based on this view, we expect that each program course or unit of
education will be able to bring about significant changes in the learners. To find out whether the expected changes have taken place or not, it is necessary for teachers to conduct a test or an examination as one of the evaluation instruments.

A test is a procedure or an appliance used to know or measure something, with determined procedures (Arikunto, 2005:53). In learning, test is a tool of evaluation which has an important role to measure the teaching learning process in schools.

Teachers have an important role in teaching and learning activity. They should master some abilities. One of that is to construct or design a good test. This test should able to measure the student understanding about the knowledge in the learning activity before. The form of the test can be various. One of that is multiple choice tests. It is easy to administer this kind of test, as a result, many teacher use this form. However, multiple choice tests are difficult to design. According to the writer experiences, when he did a teaching practice in one of junior high school, the teachers just want their student to get good score on the test. Therefore, they make many easy items test so that most of the student will get good score. When most of the students get a good score, however, it cannot be said that the quality of the test is good as well.

After that consideration, the writer wants to know the quality of the English test made by a teacher. Then, he decides to analyse the English school final exam which made by a teacher. The writer thinks, it is important to analyse the tests in term of validity, reliability, discrimination power, and difficulty level of English test items, because with this study the writer hopes that the test maker
or teacher can build a good test. The writer chooses SMP N 17 Semarang and SMP Kesatrian 2 Semarang as a place of the research because the average score of Ujian Nasional (National Examination) 2012, is in similar level in English subject.

1.2 Reasons for Choosing the Topic

This research focusses on the items analysis of English school final exam, which is administered to ninth grade students of SMP N 17 Semarang and SMP Kesatrian 2 Semarang in the academic year of 2013/2014. The reasons of choosing the topic are as follows:

   a. In teaching learning process, evaluation is important. For this reason, every test constructor must be careful in constructing the test items. The test maker must constructing the test based on the criteria of a good test.

   b. The English school final exam which administered in SMP N 17 and Kesatrian 2 Semarang has not been analyzed.

   c. By applying item analysis, we can indicate which items may be reliable and valid. We can check properly whether the test has a good quality or not.

1.3 Statement of the Problem

The writer would like to find the answer to the question: “How is the Quality of Teacher-Made English school final exam in SMP N 17 Semarang and SMP Kesatrian 2 Semarang academic year 2013/2014?”
Specifically, in analyzing the test items, the writer concerns to the following questions:

1. How is the validity of the test?
2. How is reliability of the test?
3. How is the item facility of the test?
4. How is the discrimination power of the test items?
5. Which test is better between English school final exam in SMP N 17 Semarang and SMP Kesatrian 2 Semarang academic year 2013/2014?

1.4 Purpose of the Study

The general objective of this study is to obtain an objective description of the Teacher-Made English school final exam for ninth grade in SMP N 17 Semarang and SMP Kesatrian 2 Semarang academic year 2013/2014.

The objectives are to find out:

1. The validity of each test items
2. The reliability of each test items
3. The item facility of each test items
4. The discrimination power of each test items
5. The better test between English school final exam in SMP N 17 Semarang and SMP Kesatrian 2 Semarang academic year 2013/2014?”
1.5 Significance of the Study

The advantages that can be required from this study are as follows:

(1) Theoretically, this study will give the knowledge about the important of quality of the test items in evaluate the student ability.

(2) Practically, the teachers can use the result of the study as a reference when they want to analyse test items and use it as reference to improve the degree of quality of test items for the next examination.

(3) Pedagogically, the study will contribute for improving the teachers’ skills in constructing test items and improving the quality of the education.

1.6 Limitation of the Study

The writer wanted to analyze the English school final examination and answer sheets done by the ninth grade in SMP N 17 Semarang and SMP Kesatrian 2 Semarang academic year 2013/2014

1.7 Outline of the Report

Chapter I is the introduction. It includes background of the study, reasons for choosing the topic, statement of the problems, objectives of the study, significance of the study, limitation of the study, and outlines of the report.
Chapter II discusses about the review of related literature. It deals with review of the previous study, review of the related literature, and framework of analysis.

Chapter III deals with methodology of the study, which presents method of the study, place of the study, subject of the study, procedures of data collection, and procedures of data analysis.

Chapter IV deals with analysis and discussion of research.

Chapter V gives the conclusions of the research and some suggestions on the basis of the research finding.
CHAPTER II

REVIEW OF RELATED LITERATURE

In this chapter, the writer talks about three areas of studies. The first is review of the previous studies. It presents several studies that have been conducted related to the topic. The second is the review of related literature that provides the underlying theories as the starting point of the research. The last but no means least is framework of analysis. This section encloses outline of the related literature of the research. It is served as the basic guideline for the next process of this research.

2.1 Review of the Previous Studies

There had been a number of previous studies which analyzed topics related to the item analysis, as the following:

(1) Iska Adiesti (2009) conducted a research on analyzing the English teacher made test based on Bloom’s Taxonomy. In the process of investigating, she matched the test items to the curriculum table (the items, Competence Standard, Materials, and Indicators) to find out the representativeness of the KTSP’s reading materials. Then, she analyzed it again by matching it to the basic requirements of Bloom’s Taxonomy.

(2) Wahyu Adi Purnomo (2008) conducted a research on analyzing the listening test items. He investigated the representativeness of the listening
materials from KTSP in the National examination. Furthermore, he discussed them on the basis of Brown’s questions.

(3) Aisa Widanti (2009) conducted a research on analyzing the first term English summative test for the seventh grade students. As the previous, she analyzed the validity, reliability, difficulty level, and discrimination power. In addition, she calculated the item dependability that are used exclusively for estimates of the consistency of CRTs. She concluded that the item still be used as an instrument of evaluation with some revisions and improvement.

(4) Intania Desi Nawati (2009) conducted a research on analyzing the content validity analysis of English National Writing Test for Junior High School based on the Graduate Competence Standard of KTSP curriculum. In her research, she didn’t calculate the numeric interpretation of the item, but she used the descriptive method in which the data analyzed and the analysis result is formed descriptively or as phenomenon.

(5) Diana Nurul Aziz (2010) conducted a research on analyzing the English item of students’ entrance examination in a piloting of international standardized school. She concluded that most of the test items have fulfilled the guidelines of the multiple-choice format. However, there were several test items that still needed to be revised

Based on some previous studies above, it can be stated that the researchers mostly conducted their researches in dealing with national exam or final test. And they
were dealing with one school only. The researches comparing two school final exams have not conducted yet.

2.2 Review of the Related Literature

In this sub chapter, the writer presents some theories or concepts which are used by the writer as the basic knowledge to conduct the research. This section is divided into four parts as follows: the general concept of school final examination, the general concept of test, the characteristic of a good test and general concept of item analysis.

2.2.1 The General Concept of School Final Examination

According to the Education and Cultural Minister Regulation number 3 in the year of 2013 about graduation criteria for students of education unit and implementation of school / madrasah / equality education and national exam, stated that school final examination is an activity of measurement and assessment of competence of students conducted by school / madrasah / equality education program providers for all subjects in the group of science and technology.

Different with national exam which is organized by National Education Standards agency (Badan Standar Nasional Pendidikan), school final exam organized by educational unit (school) under coordination by educational agency on every district or city. Each educational unit organized the school final exam for all subjects. This exam is held before the UN in accordance with the schedule set by the educational unit. Educational unit drafting the final exam questions based
on Competence Standard and Basic Competence in School Based Curriculum (KTSP).

2.2.2 The General Concept of Test

A test is a method of measuring a person’s ability, knowledge, or performance in a given domain (Brown 2004: 3). This definition clarifies there are five things tightly in correlation to the test. The first term to be considered is method. Method here is an instrument—a set of techniques, procedures, or items—that requires performance on the part of the test-taker. To qualify the test, the method must be explicit and structured. The second is measure. It means that test is a kind of measurement. Measurement is defined as the act of measuring. In measuring something, of course, someone needs some standard. If the instrument does not reach the standard of measurement, it can be defined as a test. The next point that should be understood is the term of individual. The testers should know well who the test-takers are, that they can determine appropriate kind of test and scoring method applied. The fourth is ability, knowledge or performance. Most language tests measured one’s ability to perform language, the others can also infer general competence, and it is depended on their purposes. Then the last is domain, that is the coverage of contents being tested to the test-takers.

It can be concluded that a test is the way to measure or tells the test taker’s level of knowledge, performance, skill or ability has been acquired.
2.2.2.1 Types of Test

Tests motivate and direct student learning because tests guide student learning and help determine how students will prepare for a test. According to Vallete (1977:5-6) there are four types of test. They are:

a. **The aptitude test**

   The aptitude test is conceived as a prognostic measure that indicates whether a student is likely to learn a second language readily.

b. **The progress test**

   The progress test measures how much the student has learned in a specific course of instruction.

c. **The proficiency test**

   The proficiency test also measures what students have learned, but the aim of the proficiency test is to determine whether this language ability corresponds to specific language requirements.

d. **The achievement test**

   The achievement test is similar to the progress test in that it measures how much the student has learned in the course of second language instruction.

According to the definitions, it can be conclude that types of test are aptitude test measures the student’s performance in learning a foreign language, progress test measures the progress in mastering the material taught in the classroom. Another type is proficiency test, it is to measure the students’ achievement to perform.
Achievement test is the last type; it measures what has been taught and learnt. In this research the writer will focus on achievement test.

2.2.2.2 Achievement Test

Achievement test plays an important role in all types of instructional program. Achievement test emphasizes past progress, whereas aptitude test primarily concerns with future potentialities. The primary goal of the achievement test is to measure past learning, that is, the accumulated knowledge and skills of an individual in a particular field or fields. Brown (2004:47) states that an achievement test is related directly to classroom lessons, units, or even a total curriculum. According to Gronlund (1982:1) an achievement test is a systematic procedure for determining the amount a student has learned. The planning of an achievement test typically includes the cooperative efforts of teacher, curriculum specialists and the experts. Achievement test is used to assessing present knowledge and abilities. The primary goal of the achievement test is to measure past learning, that is, the accumulated knowledge and skills of an individual in a particular field or fields. It can be inferred that through achievement test, we know whether the students have mastered the material or not. As a result, an achievement test should be done in the end of the course.

2.2.2.3 Types of Achievement Test

The major purpose of testing in the classroom is to measure students’ achievement as an indication of progress towards educational objectives set for the students.
According to Tinambunan (1988: 7), there are 4 (four) types of achievement test which are very commonly used in the classroom:

a. **Placement test**

Placement test is designed to determine students’ performance at the beginning of instructions. For instance, in an institution, the test is used to know what position which is appropriate with the competence of a new worker.

b. **Formative test**

Formative test is intended to monitor learning process during the instruction and to provide continuous feedback to both students and teacher concerning learning successes or failures. It is usually found in daily tests in school.

c. **Diagnostic test**

Diagnostic test is to diagnose learning difficulties to give remedial action.

d. **Summative test**

Summative test is usually given at the end of making period and measures the total of the material covered (at the end of the academic year of term).

It can be conclude that the school final examination is achievement test in term of summative test.

### 2.2.3 Characteristics of a Good Test

A test has important role in the teaching and learning process as an integral part of the instructional program that provides information that serves as a basis for a
variety of educational decisions. A test can encourage students to focus on limited aspect of the course content or direct their attention to all important areas. Considering the characteristics of a good test, there are practicality, reliability, validity, authenticity, and wash back (Brown, 2004: 19). In the other hand, Harris (1969: 13) states that all good tests possess three qualities: validity, reliability and practicality. Validity and reliability are general consideration in test evaluation that is always important. A test constructor must be sure that the test processes these two essential characteristics of a good test. In this section, the focus is on validity and reliability, because both are very essential to effective testing and should be understood by anyone working with the test.

2.2.3.1 Validity

The most important characteristic of a good test is its ability to help the teacher make appropriate decision. This characteristic is called validity. Tinambunan states that the definition of validity in a test is the extent to which the result of an evaluation procedures serve the particular uses for which they are intended (1988: 11). Gronlund in Brown (2004: 22) validity is the extent to which inferences made from assessment results are appropriate, meaningful, and useful in terms of the purpose of the assessment. The writer can conclude that validity plays important role in a test because from the validity of the test we can measure whether the test can really measure students’ ability on the material taught or not.
Basically, there are many types of validity according to some experts. According to Brown (2004:22-30), validity is divided into five types of evidence:

a. **Content-Related Evidence**

If a test actually samples the subject matter about which conclusions are to be drawn, and if it requires the test-taker to perform the behavior that is being measured, it can claim content-related validity, often popularly referred to as **content validity** (Mousavi:2002, Hughes:2003 quoted by Brown,2004:22).

b. **Criterion-Related Evidence**

A second form of evidence of the validity of a test may be found in what is called criterion-related evidence. Also referred to as **criterion-related validity**, or the extent to which the “criterion” of the test has actually been reached.

c. **Construct-Related Evidence**

Construct-Related Evidence commonly referred to as **construct validity**. A construct is any theory, hypothesis, or model that attempts to explain observed phenomena in our universe of perceptions. Construct validity is a major issue in validating large-scale standardized tests of proficiency.

d. **Consequential validity**

Consequential validity encompasses all the consequences of a test, including such consideration as its accuracy in measuring intended criteria, its impact on the preparation of test-takers, its effect on the learner, and the
(intended and unintended) social consequences of a test’s interpretation and use.

e. **Face validity**

Gronlund (1998:210) quoted by Brown (2004:26) says an important facet of consequential validity is the extent to which “students view the assessment as fair, relevant, and useful for improving learning.” or what is popularly known as **face validity**. “Face validity refers to the degree to which a test *looks* rights, and *appears* to measure the knowledge or abilities it claims to measure, based on the subjective judgment of the examinees who take it, the administrative personnel who decide on its use, and other psychometrically unsophisticated observers” (Brown adapted from Mousavi, 2002:244).

A number of factors tend to influence the validity of test results. Sidhu (2005: 53-54) points out some factors influencing validity in the following:

a. **Clear directions**

   It is when the directions clearly indicate to the pupil how to respond to the items, how to record the responses, etc. His answer will improve the validity of the test.

b. **Language**

   If the vocabulary and the sentence structure used in the questions not unnecessarily complicated, it will make the test valid. On the contrary the students might be knowing the answer but fail to answer it correctly simply because they do not understand the language of the question.
For example, a test in science which uses difficult language becomes a test in reading comprehension and does not measure what it intends to measure.

c. **Medium of expression**

take the case when English is the medium of instruction as well as examination, some of the students who know the subject matter very well fail in the subject like history or geography, only because they fail to express the subject matter through English. A test will be more valid if its answers are demanded in a language suitable for the students as a medium of expression.

d. **Difficulty level of items**

Test item which are either too easy or too difficult will not provide discrimination among students. This is against the validity of the test.

e. **Construction of test item**

Test items which provide clues to the answers tend to measure primarily a pupil’s alertness. Thus an alert pupil gets an undue benefit over the less alert pupil though the latter may be knowing the subject matter equally well. Poorly constructed test items adversely affect the validity of the test. Classroom test are so constructed that they measure primarily the knowledge objective. Their questions give undue importance to the student’s ability to memorise factual information. More important objectives like application, thinking and skill are not covered in these tests which consequently invalidate the result.
f. Time limit

If time limit given in an achievement test is inadequate, the fast writer will get an advantage over the slow writer. Instead of measurement of achievement, the test will measure the speed of writing. On the other hand, if sample time is allowed in a speed test, where time is the most important factor, it will invalidate the result. The time limit of a good test is specified in the light of its try out and the process of standardisation.

g. Extraneous factors

Extraneous factors have to be eliminated in order to ensure the validity of the test. But these factors usually enter into the process of testing, in spite of our best precautions. In essay type tests or short answer type tests the examiner is greatly influenced by such factors as style of expression, method of organising the subject matter, good handwriting, coverage of vastness through brevity, etc. Such factors lower the validity of the test of achievement. The practice of deducting marks for lack of neatness or for poor handwriting is an example of giving undue importance to extraneous factors. In an objective type test, the length of instructions, the vagueness of instructions, the confusing or lengthy statement of an item, bad arrangement or format of the items and the options of the responses are some of the extraneous factors.
The writer can conclude that validity plays important role in a test because from the validity of the test we can measure whether the test can really measure students’ ability on the material taught or not.

2.2.3.2 Reliability

Reliability is defined as the extent to which a questionnaire, test, observation or any measurement procedure produces the same results on repeated trials. Brown points out that a reliable test is consistent and dependable (2004: 20). Harris (1969: 15-16) gives several ways to estimate the reliability of a test:

a. **Test-retest technique**

   is simple technique that the same individuals would be tested and retested with the same test and then compares each student’s result on both testing.

b. **The use of alternate or parallel form,**

   that is, with different versions of the same test which are equivalent in length, difficulty, time limits, formal and all other such aspects.

c. **Internal consistency method.**

   There are three ways of estimating this method. The first method is odd and even method .It’s a method for estimating reliability of a test by giving a single administration of one form of the test then dividing the items into halves (usually by separating odd and even number items).

   Second is Split-half method. It’s a method for obtaining two scores for each individual. Then the reliability coefficient can be determined by computing the correlation between them.
The last is Kuder-Richardson method. This method measure the extent to which items within one form of the test have as much in common with one another as do the items in that one form with corresponding items in equivalent form. Kuder and Richardson have published two formulas, they are Kuder-Richardson Formula 20 and Kuder-Richardson Formula 21.

The Formula 20 is: \[ r = \left( \frac{K}{K-1} \right) \left( 1 - \frac{\sum_{i=1}^{n} pq}{s^2} \right) \]

where,

- \( K \) = number of the items
- \( p \) = proportion of correct responses to a particular item
- \( q \) = proportion of incorrect responses to that item (so that \( p \) plus \( q \) always equals 1)
- \( s \) = variance of the scores on the test

The formula 21 is:

\[ r = \frac{K}{K-1} \left( 1 - \frac{M \left(K-M \right)}{KS^2} \right) \]

Where,

- \( K \) = the number of items in the test
- \( M \) = the mean (arithmetic average) of the test scores
- \( S \) = the standard deviation of the test scores

(Rajamanickam, 2001: 200-201)

It can be conclude that reliability is consistency of test. Consistency happens when the test is administered to the same group of individuals in two different
settings and occasions, then it doesn’t make any difference to both of scores obtained. The test should be reliable because unreliable test might produce different scores if it was taken again.

2.2.4 Item Analysis

Item analysis is a process which examines student responses to individual test items (questions) in order to assess the quality of those items and of the test as a whole. Item analysis is especially valuable in improving items which will be used again in later tests, but it can also be used to eliminate ambiguous or misleading items in a single test administration. According to Grounlund (1981: 225-256) item analysis has several benefits. (1) It provides useful information for class discussion of the test. (2) Item analysis provides data that helps students improve their learning if the students frequently choose the wrong answer. It provides a focus in remedial work. (3) Item analysis provides a skill that lead to the preparation of better test in the future. Thus, item analysis tell us if an item was too difficult or too easy, how well it discriminated between high and low scores on the test, and whether all the alternatives functioned as intended. In item analysis, there are three major components: level of difficulty, discrimination power, and the effectiveness of each alternative. This research focused on level of difficulty and discrimination power.
2.2.4.1 Item Facility

Item facility goes by many other names: level of difficulty, item difficulty, item easiness, $p$-value, or abbreviated simply as IF (Brown 2002:114). McCauley (2001: 57) as quoted by Diana (2010:28) says that Item difficulty (P) is the number of person answering the item correctly divided by the item. It can be used to gauge whether an item is appropriate to the range of abilities characteristics of the target population. The index of item difficulty increase as the item gets easier and decrease, as it gets more difficult. The item facility or index of difficulty (P) can be calculated by adding up the number of students who correctly answered a particular item and divide that sum by the total number of students who took the test (Brown 2005: 66). According to Nitko (1983: 288) the index of item facility can be shown as follows:

1. an item with difficulty level of $0.00 \leq p \leq 0.25$ is a difficult item.
2. an item with difficulty level of $0.26 \leq p \leq 0.75$ is moderate item
3. an item with difficulty level of $0.76 \leq p \leq 1.00$ is an easy item.

The item facility of the test item itself can be investigated by applying the formula as follows:

$$IF = \frac{N \text{ correct}}{N \text{ total}}$$

Where,

$N \text{ correct}$ = number of students answering correctly

$N \text{ total}$ = total number of students taking the test

Brown (2005: 66)
2.2.4.2 **Item Discrimination Power**

Discrimination Power or item discrimination is the extent to which an item differentiates between high and low-ability test takers. An item on which high ability students (who did well in the test) and low ability students (who didn’t) score equally well would have poor item discrimination because it did not discriminate between the two groups. (Brown, 2004:59).

According to Gronlund (1982:103) the computation of item discriminating index (D) for each item can be done by using this formula:

\[
D = \frac{RU - RL}{1/2T}
\]

Where,

- \(D\) : the index of discrimination power
- \(RU\) : the index of student in the upper group who answer the item correctly
- \(RL\) : the index of student in the lower group who answer the item correctly
- \(1/2T\) : the number of students in each of the group

The criteria of item discrimination power could be seen in the table below which is proposed by Ebel and Frisbie (1991: 232) are:

<table>
<thead>
<tr>
<th>Discrimination index</th>
<th>Item evaluation</th>
</tr>
</thead>
<tbody>
<tr>
<td>(0.70 \leq DP \leq 1.00)</td>
<td>Excellent</td>
</tr>
<tr>
<td>(0.40 \leq DP \leq 0.70)</td>
<td>Good</td>
</tr>
<tr>
<td>(0.20 \leq DP \leq 0.40)</td>
<td>Satisfactory</td>
</tr>
<tr>
<td>(0.00 \leq DP \leq 0.20)</td>
<td>Poor</td>
</tr>
</tbody>
</table>
2.3 Framework of Analysis

School final examination is an activity of measurement and assessment of competence of students conducted by school / madrasah / equality education program providers for all subjects in the group of science and technology. The schools were drafting the final exam questions based on Competence Standard and Basic Competence in School Based Curriculum (KTSP). As a result, the teacher would make the test questions.

Related to the purpose of this research that is to find out the quality of the teacher-made school final exam, the writer would analyze the test item on the school final exam of ninth graders of SMP N 17 Semarang and SMP Kesatrian 2 Semarang in academic year 2013/2014.

In analyzing the test item, there are several points which should be analyzed. In analyzing validity, the writer would like to apply the Product Moment formula. If the r value is more than the r value in the table, it can be stated that the test item is valid, and vice versa. The reliability of the test items would be analyzed with Kuder- Richardson Formula 20. When the result of r value is more than the r value in the table, then the test can be stated as the reliable one. The level of difficulty of the test item (IF) would be investigated by adding up the number of students who correctly answered a particular item and divide that sum by the total of number of students who took the test. The discrimination index can be computed by substracting the IF for the lower group from the IF for the upper group on each item. After that the writer would describe based on Ebel and Frisbie criteria (1991: 232).
DATA
School final exam of ninth graders SMP N 17 and SMP Kesatrian 2

ANALYZE

Validity
\[ r_{xy} = \frac{N \sum XY - (\sum X)(\sum Y)}{\sqrt{N \sum X^2 - (\sum X)^2} \sqrt{N \sum Y^2 - (\sum Y)^2}} \]

Criteria
- \( r_{xy} > r \text{ table} = \text{valid} \)
- \( r_{xy} < r \text{ table} = \text{not valid} \)

Reliability
KR-20
\[ r = \left( \frac{K}{K-1} \right) \left( 1 - \frac{\sum pq}{S^2} \right) \]

Criteria
- \( r > r \text{ table} = \text{reliable} \)
- \( r < r \text{ table} = \text{not reliable} \)

Item facility
\[ IF = \frac{N \text{correct}}{N \text{total}} \]

Criteria
- \( 0.00 \leq IF \leq 0.25 \) is a difficult
- \( 0.26 \leq IF \leq 0.75 \) is moderate
- \( 0.76 \leq IF \leq 1.00 \) is an easy

Item discrimination
\[ D = \frac{RU - RL}{1/2T} \]

Criteria
- \( 0.70 \leq DP \leq 1.00 \) is Excellent
- \( 0.40 < DP \leq 0.70 \) is Good
- \( 0.20 < DP \leq 0.40 \) is Satisfactory
- \( 0.00 < DP \leq 0.20 \) is Poor

CONCLUSION
CHAPTER III

METHOD OF INVESTIGATION

This chapter presents method of investigation of the study. It begins with a brief elaboration on the method of the study. After that the writer discusses the place and subject of the study. Next, the instrument and procedures of collecting data. Last is procedures of analyzing data.

3.1 Method of the Study

The purpose of this study is to obtain an objective description of the teacher made English school final exam for ninth grade students of SMP N 17 Semarang and SMP Kesatrian 2 Semarang. The writer only focused on describing validity level, reliability level, difficulty level, and discrimination power of each test items. The writer used quantitative research. According to Hornby (2000: 1078), quantitative is connected with amount of number of something rather than with how good it is. In this term, quantitative data refers to the use of statistical analysis to calculate the numeral data that are gathered and to analyze them by the use of correlation analysis. The data are expressed in the language of mathematics and must be, consequently, expressed and interpreted by means of appropriate statistical procedure.
3.2 Place of the Study

This study was conducted at SMP N 17 Semarang that is located at jalan Gabeng Raya Jangli, Semarang and SMP Kesatrian 2 Semarang that is located at jalan Pamularsih No.96 Semarang.

3.3 Subject of the Study

One step that should be applied before gaining the data is to decide the subject of the study. According to Hadjar (1996: 133) as quoted by Purwanto (2008: 236), subject is the individuals taken part in the research from where the data will be collected. Before collecting the data, the researcher should decide whether the data used will be taken from the whole population or just a part, namely sample.

3.3.1 Population

Population, as stated by Tuckman (1978: 227), is that group which the research is interested in gaining information and drawing conclusions. Arikunto as quoting in the Encyclopedia of Education Evaluation that population is a set (or collection) of all elements processing one or more attributes of interest (2004:130). Referring to the definition above, the population of this study is 243 students of ninth grade of SMP N 17 Semarang and 245 students of ninth grade SMP Kesatrian 2 Semarang in the academic year 2013/2014.
3.3.2 Sample

Tuckman (1978: 226) suggests that sample is defined as representative group from the population to serve as respondents. Arikunto claims that sample is a part of population that represents the whole (2004: 131). He suggests that if the number of the subject in the population is less than 100, it is better for the researcher to take the entire object. However, if the number of subject in the population is more than 100, researcher can take 10%-15% or 20%-25% or more of the object as the sample depending on the situation (2004: 132). In this study, the writer took 30 students of 243 students of the grade IX of SMP N 17 Semarang and 30 students of 245 of the grade IX of SMP Kesatrian 2 Semarang as the sample. So, it was only 12.5% of the population.

3.4 Procedures of Data Collection

In order to get the required data, the writer asked for permission to copy the answer sheet and question sheet from the English school final exam of the ninth grade of SMP N 17 Semarang and SMP Kesatrian 2 Semarang in the academic year 2013/2014. Then the writer collected the item test and analyzes the result of the item test to know the validity, reliability, item difficulty, and item discrimination for each school.

3.5 Procedures of Data Analysis

The data to be analyzed are taken from the students’ answer sheet of students’ answer sheet in school final exam for the ninth grade of junior high school
students in the academic year 2013/2014. These students’ answer sheets are used to analyze the quality of the test items includes the validity, reliability, difficulty level, and discrimination power.

3.5.1 Item Facility Analysis

Item facility is the degree that shows how difficult or easy a test is. A good test item is an item which is not too difficult and not too easy. The index of facility of an item can be shown as follows:

1. an item with difficulty level of $0.00 \leq p \leq 0.30$ is a difficult item.
2. an item with difficulty level of $0.30 < p \leq 0.70$ is moderate item
3. an item with difficulty level of $0.70 < p \leq 1.00$ is an easy item.

(Nitko, 1983: 288)

Item facility of a test item can be calculated by applying the formula as follows:

$$IF = \frac{N_{correct}}{N_{total}}$$

where,

$N_{correct}$ = number of students answering correctly

$N_{total}$ = total number of students taking the test

(Brown 2005: 66)

3.5.2 Item Discrimination Power Analysis

The discriminating power of a test item is its ability to differentiate between students who have achieved well (the upper group) and those who have achieved poorly (the lower group). To estimate item discriminating power is by comparing
the number of students in the upper and lower group who answered the item correctly.

The computation of item discriminating index (D) for each item can be done by using this formula:

\[
D = \frac{RU - RL}{\frac{1}{2}T}
\]

where:

- \(D\) : the index of discrimination power
- \(U\) : the index of student in the upper group who answer the item correctly
- \(L\) : the index of student in the lower group who answer the item correctly
- \(\frac{1}{2}T\) : the number of students in each of the group

(Gronlund 1982:103)

In this study, the writer used the criteria of item discrimination power could be seen in the table below which is proposed by Ebel and Frisbie (1991: 232):

<table>
<thead>
<tr>
<th>Discrimination index</th>
<th>Item evaluation</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.70 ≤ DP ≤ 1.00</td>
<td>Excellent</td>
</tr>
<tr>
<td>0.40 ≤ DP ≤ 0.70</td>
<td>Good</td>
</tr>
<tr>
<td>0.20 ≤ DP ≤ 0.40</td>
<td>Satisfactory</td>
</tr>
<tr>
<td>0.00 ≤ DP ≤ 0.20</td>
<td>Poor</td>
</tr>
</tbody>
</table>

By using the criteria above, the writer analyzes the items, therefore, the test can be said as a good test or not.
3.5.3 Reliability Analysis

Reliability is defined as the extent to which a questionnaire, test, observation or any measurement procedure produces the same results on repeated trials. In this study, the writer uses Kuder-Richardson 20 (KR-20) formula to find out the reliability. The KR20 formula is:

\[
r = \frac{k}{k-1} \left[ s^2 - \frac{\sum pq}{s^2} \right]
\]

where:
- \( r \) : reliability coefficient
- \( k \) : the number of items
- \( p \) : the number of students who answered correctly
- \( q \) : the number of students who answered incorrectly
- \( s^2 \) : the total variance

(Rajamanickam, 2001: 200)

The formula to calculate variance is:

\[
s^2 = \frac{\sum Y^2 - (\sum Y)^2}{N}
\]

The result of the reliability (\( r \)) calculation is consulted to the value of \( r \) product moment on the table. If the value of \( r \) calculation is lower than the value of \( r \) on the table, we can say that the item is not reliable. On the other hand, the item is reliable if the value of \( r \) calculation is more than the value of \( r \) on the table.
3.5.4 Validity Analysis

Validity refers to whether or not a test measures what it proposes to measure. First, the writer wanted to analyse the content validity of the test. Content validity addresses the match between test questions and the content or subject area they are intended to assess. Therefore, the writer would match the items of the tests with the material on the curriculum which should be tested in English School final exam of ninth grader. It would be analyse use this table below.

<table>
<thead>
<tr>
<th>Material in the Curriculum</th>
<th>Item number</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>READING</strong></td>
<td>1 2 3 4</td>
</tr>
<tr>
<td>Determine the general overview / main idea of a paragraph or specific information / information implied or referral word or meaning of words / phrases or communicative goals in a short functional text in the form of:</td>
<td>a.caution/notice/warning</td>
</tr>
<tr>
<td></td>
<td>b.greeting card</td>
</tr>

</tbody>
</table>

Note: Mark (√) if the item match with the material.
Secondly, The writer wanted to measure criterion related validity. To calculate that, the writer used Pearson’s Product Moment formula:

\[ r_{xy} = \frac{N \sum XY - (\sum X)(\sum Y)}{\sqrt{[N \sum X^2 - (\sum X)^2][N \sum Y^2 - (\sum Y)^2]}} \]

where: 
- \( r_{xy} \): correlation index
- \( x \): the score of the item
- \( y \): the total score
- \( N \): the total number of the respondent

(Arikunto, 2004: 244)

According to Arikunto (2002: 154), if the value of calculation is lower than the critical value on the table, that the correlation is not valid. Therefore, to determine the validity of each item, the writer was consulting the \( r \) product moment value on the table. If the \( r_{xy} \) lower than \( r \) product moment value on the table, then the item is not valid and vice versa.
CHAPTER V

CONCLUSION AND SUGGESTION

This chapter provides conclusions drawn based on what had been discussed in the previous chapters. Additionally, some suggestions are also provided in this chapter.

5.1 Conclusion

Based on the results of the analyses of the both test items of English school final exam for ninth graders student made by English teachers of SMP N 17 Semarang and English teachers of SMP Kesatrian 2 Semarang in the academic year 2013/2014, it could be drawn the conclusions as follows:

(1) In terms of the content validity, all items of both tests have compatibility with the material in the curriculum. It means that both test of SMP N 17 and SMP Kesatrian 2 Semarang had measured what should be measured and have high content validity. However, the English school final exam of SMP Kesatrian 2 was better than SMP N 17 Semarang because SMP Kesatrian 2 did not have a bad item structure. In terms of criterion validity, the English school final exam of SMP N 17 Semarang, there were 25 valid test items. The mean of validity of this test was 0.328. Meanwhile, from English school final exam of SMP Kesatrian 2 Semarang, there were only 9 valid test items and the mean of validity was 0.277. Since the r table was 0.361 and the mean of the validity of both tests were lower than the r table, it can be concluded that both tests were not valid.
(2) In term of the reliability, the English school final exam of SMP N 17 Semarang had the coefficient of reliability of 0.874, while the English school final exam of SMP Kesatrian 2 Semarang had the coefficient of reliability of 0.631. According to it, the coefficient of reliability from both school were higher than the r table. As a result, both tests were reliable.

(3) From the result of item facility or item difficulty level, the English school final exam of SMP N 17 Semarang had the mean of item facility of 0.72. Based that calculation result this test was classified in to an easy test. On the other hand, the mean of item facility of the English school final exam of SMP Kesatrian 2 Semarang was 0.76. It can be concluded that the difficulty of this test was also an easy test.

(4) In the analysis of item discriminating power, the English school final exam of SMP N 17 Semarang had 7 items were categorized as good items, 16 items were classified as good items, and 27 items were categorized as poor items. From the 50 test items, the mean of the discrimination power value was 0.22, which meant that the English school final exam of SMP N 17 Semarang had the satisfactory discrimination power. On the other hand, of the English school final exam of SMP Kesatrian 2 Semarang had 10 items were categorized as satisfactory items and 40 items were categorized as poor items. With the mean of discrimination power value was 0.13, it meant that the English school final exam of SMP Kesatrian 2 Semarang had the poor discrimination power. A test which had poor discrimination power is not
good enough to be used because it has no power to distinguish between high-achiever students and low-achiever students.

(5) Based on the analysis made by the writer, the English school final exam of SMP N 17 Semarang, there were only 9 items which still can be used, 14 items which still can be used with several revisions, and 27 items which should be discarded. Meanwhile, from the English school final exam of SMP Kesatrian 2 Semarang, there was only 1 item which still can be used, 4 items which still can be used with several revisions, and 45 items which should be discarded. According to this data finding, the quality of both tests was not good enough. It was because of the number of items which had not met the requirements to be called as a good test item. If the both test were compared, the quality of English school final exam of SMP N 17 Semarang, however, is better than the quality of English school final exam of SMP Kesatrian 2 Semarang. It could be proven from the number of items which were categorized into good test item. There were 9 items which fulfilled the criteria as good test items from the English school final exam of SMP N 17 Semarang. On the other hand, there was only 1 item from the English school final exam of SMP Kesatrian 2 Semarang which had fulfilled the criteria as a good test item and still can be used.

5.2 Suggestion

Constructing good language test items is a difficult task. It requires more effort, energy and time, even though the test was made by more than one teacher. There
are many competencies that should be fulfilled by a good teacher. One of that is the ability to design or construct a good test

The teachers or the test makers of the test should know the characteristic of a good set of test items which includes validity, reliability, item facility, and item discrimination. We know that the teachers would more appreciate if most of their students always get good score in the test. If many students who get good score, however, it does not always mean the quality of the test is good as well.

Based on the conclusion, the writer will give some suggestions for the teachers as the test maker, to design a good test:

(1) Prepare the test items long before it is administered

(2) Double check the question sheet to minimalize error typing questions.

(3) Pay more attention to the item level of difficulty and discrimination power.

(4) The test maker should keep the item which can be used and revised if they want to use it in another test.

The writer hopes the result on this item analysis can be used as an example or reference in analyzing and developing other test items, and as a trigger other researchers to do a research on the same topic.

Appendix 13

THE COMPUTATION OF ITEM VALIDITY

The formula used by the writer is:

\[ r_{xy} = \frac{N \sum XY - (\sum X)(\sum Y)}{\sqrt{[N \sum X^2 - (\sum X)^2][N \sum Y - (\sum Y)^2]}} \]

where: \( r_{xy} \) : correlation index

\( x \) : the score of the item

\( y \) : the total score

\( N \) : the total number of the respondent

This is the example of the computation of item validity for item number 1 of English school final exam of SMP N 17 Semarang:

\[ r_{xy} = \frac{(30 \times 1012) - (28 \times 1073)}{\sqrt{((30 \times 28) - (28)^2)((30 \times 39779) - (1073)^2)}} \]

\( r_{xy} = 0.206 \)

With \( a = 5\% \) and number of subject = 30, \( r \) table = 0.361

Because \( r_{xy} < r_{table} \), so the item number 1 is not valid

The rest of the item

validity analysis uses the same process.
Appendix 14

THE COMPUTATION OF ITEM RELIABILITY

The writer used Kuder-Richardson 20 formula in determining the reliability of the test. The formula is:

\[
r = \frac{k}{k-1} \left[ \frac{s^2 - \sum pq}{s^2} \right]
\]

where:

- \( r \): reliability coefficient
- \( k \): the number of items
- \( p \): the number of students who answered correctly
- \( q \): the number of students who answered incorrectly
- \( s^2 \): the total variance

The formula to calculate variance is:

\[
s^2 = \frac{\sum Y^2 - (\sum Y)^2}{N}
\]

This is the example of the computation of reliability of the English school final exam of SMP N 17 Semarang:

The variance is:

\[
S^2 = \frac{\sum Y^2 - (\sum Y)^2}{N}
\]
\[
\frac{39779 - \left(\frac{1073}{30}\right)^2}{30} = 46.7122
\]

So, the reliability is:

\[
r = \left[\frac{k}{k-1}\right]\left[\frac{S^2 - \sum pq}{S^2}\right]
\]

\[
r = \left[\frac{50}{50-1}\right]\left[\frac{46.7122 - 7.96}{46.7122}\right]
\]

\[r = 0.847\]

For \(a = 5\%\) and number of subject = 30, \(r_{table} = 0.361\)

Because \(r_{11} > r_{table}\) then test is reliable

The same process is used to calculate the reliability of English school final exam of SMP Kesatrian 2 Semarang.
Appendix 15

THE COMPUTATION OF ITEM FACILITY

In order to calculate the item facility, the writer used this formula:

\[ \text{IF} = \frac{N_{correct}}{N_{total}} \]

where,

\begin{align*}
\text{IF} & : \text{difficulty level or index of difficulty} \\
N_{correct} & : \text{number of students answering correctly} \\
N_{total} & : \text{total number of students taking the test}
\end{align*}

This is the example of the computation of item facility for item number 1 of the English school final exam of SMP Kesatrian Semarang:

\[ \text{IF} = \frac{N_{correct}}{N_{total}} \]

\[ = \frac{22}{30} = 0.73 \]

Based on the criteria, item number 1 belongs to easy item

The rest of the item facility calculation used the same formula.
Appendix 16

THE COMPUTATION OF ITEM DISCRIMINATION

The writer used the formula below to determine the item discrimination:

\[ D = \frac{RU - RL}{\frac{1}{2}T} \]

where:

- \( D \): the index of discrimination power
- \( U \): the index of student in the upper group who answer the item correctly
- \( L \): the index of student in the lower group who answer the item correctly
- \( \frac{1}{2}T \): the number of students in each of the group

This is the example of the computation of item discrimination for item number 1 of English second mid-term test of SMP Kesatrian 2 Semarang:

\[ D = \frac{RU - RL}{\frac{T}{15}} = \frac{13 - 9}{15} = 0.27 \]

According to the criteria, this item has poor discrimination power.

The writer used the same formula to calculate the rest of item discrimination analysis.
Appendix 17

The Examples of Students’ Answer Sheets
Appendix 18

Test Sheets of SMP N 17 Semarang
Choose the correct answer by crossing A, B, C or D

The following text is for questions 1 and 2.

![Congratulations!]

May you create countless memories in your new home!
All the best.

1. "May you create countless memories..."
   What does the word "countless" mean?
   A. A few.
   B. Several.
   C. A little bit.
   D. Very many.

2. People send the card in order to....
   A. congratulate someone on his new home
   B. invite someone to the housewarming
   C. praise someone for his new house
   D. advertise someone's house

Read the text and answer the questions 3 and 4.

Dear Alice,
Please come to my 14th birthday party on:
Date: Saturday, 5 April 2014
Time: 7.00 p.m.
Place: Salle House Srivijaya, Jl. Srivijaya Semarang
I really hope that you can come. There will be something missing without your presence.

Esperanza

3. When was Esperanza born?
   A. In 2006
   B. 2001
   C. 2002
   D. 2004

4. The party will be held....
   A. At night
   B. In the evening
   C. In the afternoon
   D. In the morning

This text is for question number 5

[CAUTION]
Chimney bank
Dangerous hill
Engage low gear now
Cyclists please dismount
5. What does the caution above mean?
A. The bank has a tall chimney.
B. The hill is dangerous to climb.
C. Cyclists should get off the bicycle.
D. Drivers must put the car into reverse gear.

The following text is for questions 6 and 7.

6. Who got an accident?
A. Desi
B. Okia
C. Fadi
D. Tina

7. "Please text Tina and Sarah for this postponement."
The underlined word has similar meaning to....
A. halt
B. delay
C. suspension
D. cancellation

This text is for question number 8.

WARNING!
Children under 14 years are not allowed in this swimming pool.

8. From the text above, it can be concluded that....
A. Adults must be banned to swim in the pool.
B. Children more than 14 years old are forbidden to swim in the pool.
C. Only the children under 14 years old are authorized to swim in the pool.
D. Children under 14 years old are prohibited to swim immediately but allowed
The following text is for questions 9 and 10.

**Dear Andre Alfirahy**
The Competition was so competitive. However, the jury announced, 'The first winner goes to Andre Alfirahy, a student of SMP Harapan Baru, Indonesia.' You have proved yourself as the best student.

**CONGRATULATIONS YOUNG INVENTOR**
On your success to be the first winner of the Young Inventor Physics Project Olympiad in Bosnia. Today prove something that we have always known about you. You're pretty smart. Wishing you many more successes in the future and keep being respectful.

Your friend,

Aysya Dolfiany

9. What is the writer's purpose to write the text?
   A. To show her special attention to the writer who is really smart in physics.
   B. To congratulate Andre for his success to be the first winner of the Olympiad.
   C. To express her wish to be the first winner of the Physics Project Olympiad.
   D. To support Andre Alfirahy in order to win the coming trophy of young inventors.

10. From the text, we can conclude that Aysya Dolfiany...
    A. Accompanied Andre during the Olympiad.
    B. Taught Andre how to win the best title.
    C. Knew Andre when they met in Bosnia.
    D. Cheered Andre for winning the Olympiad.

The following text is for questions 11 and 12.

**PET TRAINING CLASSES INVITATION**
For tips on exercising, feeding, and grooming your pet, please come to the free one-hour "pet parenting".

Classes will be offered at the Jogja Society Animal Shelter and held every Saturday from 2 to 3 p.m. at 58 Sudirman Street in Jogjakarta.

Attendees receive a certificate of participation at the end of the class.

Space is limited, so it is important to register early.

For more information, call (0274) 21321.

11. What is the class about?
   A. Exercising, feeding, and grooming pet.
   B. Offering an animal shelter.
   C. Giving tips to attendees.
   D. Being a pet trainer.

12. What is the purpose of the text?
   A. To show people how to take care of the pet.
   B. To invite people to the pet training classes.
   C. To persuade people to groom their pet.
   D. To inform about the pet parenting.
SCHOOL ANNOUNCEMENT

TO: All Teachers and Students

The computer laboratory is temporarily closed due to the damage caused by electrical fault. School guards reported seeing two wires touched and some computers short-circuited. The laboratory technicians are currently trying hard to prevent those electronic machines go up in flames. Should you ever need a computer for immediate work, please don't hesitate to contact the school administrators.

I am sorry for the inconvenience.

The Principal

13. Who reported the electrical fault?
A. The guards.
B. The teachers.
C. The students.
D. The technicians.

14. The principal wrote the text in order to:
A. tell about the electrical fault
B. inform the closure of the laboratory
C. notify the students that two wires touched
D. warn the teachers not to open the laboratory

The following text is for questions 15 to 17.

Dear Sir,

I am writing to complain about the meal I had at your restaurant - 71 w. Jogernd - last Saturday night.

The service was very slow and when the meal finally arrived the curry was cold. When I asked for the meal to be taken back and reheated, the waiter was rude and shouted at me and my friends. In fact he told me that I should have ordered something different. Finally, when the bill came there was a mistake on it - we were charged twice for our dessert.

If this is a typical of your usual standard of service, I for one will not come back in a rush!

Yours faithfully

Chad Hertling

15. "...the waiter was rude and shouted at me and my friends." (Paragraph 2)

The underlined word is closest in meaning to...:
A. wise
B. polite
C. patient
D. horrible

16. "... when the bill came there was a mistake on it." (Paragraph 3)

The underlined word refers to:
A. the restaurant
B. the waiter
C. the meal
D. the bill

17. What is the main idea of paragraph 2?
A. The meal was not taken back and reheated.
B. The customer ordered something different.
C. The restaurant gave a very bad service.
D. The waiter served the customer rudely.
18. When did they have a traditional pottery lesson?
   A. On the 24th
   B. On the 25th
   C. On the 26th
   D. On the 27th

19. From the text we can conclude that the visitors...
   A. had a hectic schedule in Yogyakarta
   B. visited some schools in Yogyakarta
   C. stayed for 5 days in Yogyakarta
   D. took an afternoon flight to Bali

20. “Visit to Borobudur Temple is the afternoon with a stopover at Borobudur Silver…”
   What is the synonym of the word “stopover”?
   A. Sleep-over.
   B. Take over.
   C. Pull over.
   D. Layover.
The Wind and the Sun

The Wind and the Sun were arguing over "which was the stronger". Suddenly they saw a traveler coming down the road, and the Sun said: "I see a way to decide our argument. Whichever of us can cause that traveler to take off his cloak shall be regarded as the stronger. You begin."

So the Sun retired behind a cloud, and the Wind began to blow as hard as it could upon the traveler. But the harder he blew the more closely did the traveler wrap his cloak round him, till at last the Wind had to give up in despair.

Then the Sun came out and shone in all his glory upon the traveler. He soon found it too hot to walk with his cloak on. So finally, the traveler took off his cloak.

Kindness effects more than unkindness.

21. What is the story about?
A. The sun and his glorious shine
B. Making the traveler taking off his cloak.
C. The wind and his harsh blow upon the traveler.
D. Finding a way to decide which was the stronger.

22. "...the traveler wrap his cloak round him..." (Paragraph 3)
   The underlined word is similar in meaning to....
A. protect
B. cover
C. keep
D. put

23. Which information can be found in the text?
A. The argument is about "which was the stronger"
B. Finally, the traveler had to give up in despair.
C. The sun shone in all his glory behind a cloud.
D. The wind is stronger than the sun.

24. What can we learn from the story?
A. Don't give up easily.
B. Show our glory to defeat others.
C. Kindness effects more than unkindness.
D. The sun is more glorious than the wind.

A Wolf had been eating on an animal he had killed, when suddenly a small bone in the meat stuck in his throat and he could not swallow it. He soon felt terrible pain in his throat, and ran up and down groaning and groaning and seeking for something to relieve the pain. He tried to ask every one he met to remove the bone.

"I would give anything," said he, "if you would take it out." At last the Crane agreed to try, and told the Wolf to lie on his side and open his jaws as wide as he could. Then the Crane put its long neck down the Wolf's throat, and with its beak loosened the bone, till at last it got it out.
“Will you kindly give me the reward you promised?” said the Crane. The Wolf grinned and showed his teeth and said: “Be content. You have put your head inside a Wolf’s mouth and taken it out again in safety; that ought to be reward enough for you.”

25. What does the story tell us about?
A. A greedy wolf and a helpful crane.
B. A small bone in the wolf’s throat.
C. The terrible growing wolf.
D. The crane’s best reward.

26. Why did the wolf feel terrible pain?
A. He ate a small animal’s bone.
B. A small bone stuck in his throat.
C. There was a small bone in his jaws.
D. The wolf tried to remove a small bone.

27. What is the moral to the story?
A. Honesty is the best policy.
B. Be greedy to save your life.
C. Show your gratitude for any help.
D. Gratitude and greed do not go together.

The following text is for questions 28 to 30.

Making a sock puppet is really quite fun. What’s especially fun about sock puppets is that you can make each one unique and individual.

**Materials:**
- An old sock
- Glue
- Googly eyes
- A pile of string

**Steps**
1. Find an old, clean sock. It can be any color you like, and it should be long enough for you to stick your arm in.
2. Glue or sew the googly eyes, join them on the bottom of the sock, or at the toe end.
3. Once the glue is dry, stick your hand in, form your hand into the shape of a mouth.
4. Use a smaller oval in a different color to simulate a tongue.
5. Consider a pile of string for hair.
6. Roll up a length of fitch with a pipe cleaner inside for arms.
7. Finally, add on the extras! Your puppet could have everything down to eyelashes, hoop earrings, bow ties, and hair ribbons.

28. What should we do after forming our hand into the shape of a mouth?
A. Making arms from felt and a pipe cleaner.
B. Using a smaller oval to simulate tongue.
C. Considering a pile of string for hair.
D. Adding on the extras.

29. “...join them on the bottom of the sock...” (step 2)
What does the underlined word refer to?
A. The old socks.
B. The long arms.
C. The googly eyes.
D. The sock puppets.
30. The text mainly talks about how to:
A. make use of an old sock
B. design a puppet craft
C. make a sock puppet
D. play a sock puppet

The following text is for questions 31 and 32.

1 JULY - 1 AUGUST 2003
20% - 50% DISCOUNT

<table>
<thead>
<tr>
<th>STATIONARY</th>
<th>FASHION</th>
</tr>
</thead>
<tbody>
<tr>
<td>30% off all item</td>
<td>50% off all item</td>
</tr>
<tr>
<td>Pens</td>

</tbody>
</table>

31. What item are sold with a 20% discount?
A. Household appliances  C. All item
B. Stationary            D. Fashion

32. The following item are available in the store EXCEPT......
A. T-Shirt                C. Newspaper
B. Markers                D. Refrigerators

The following text is for questions 33 to 35.

I love my bike. I have had it for five years and it still looks like new. This bike is the most valuable thing for me because I got it from my father.

My bike is quite big and very heavy. It looks like a horse. The bike consists of two circles with a lot of spokes. This bike also has a wicker basket in which I always have some sweets. I find that the basket is very useful. On the handlebars, it has a mirror and a big, blue bell. The handlebar is very comfortable.

When I am cycling, I sit on a brown leather saddle. My bike is unique because of its patterns and decorations. It has a special mix of colors: pink, black, and blue. It also has colored stripes. This bike is made of steel and made in Poland. I think my colorful bicycle will last a lifetime. If I look after it very carefully, it is the best bike I have ever seen.

33. What is mainly discussed in the text?
A. A Made in Poland bike.
B. A big and heavy bike.
C. A comfortable bike.
D. A favorite bicycle.

34. What is the main idea of paragraph 3?
A. The writer likes riding her bicycle.
B. The writer looks after the bike carefully.
C. The bike has unique patterns, decorations, and colors.
D. The bike is made of steel and made in Poland.
35. “This bike is the most valuable thing for me...” (Paragraph 1)
The underlined word is closest in meaning to...
A. precious
B. memorable
C. expensive
D. fantastic

The following text is for questions 36 to 38.

Last Saturday was the June Fair at school. It was good fun. There were lots of stalls selling food and even a bouncy castle. There were donkey rides too.

They had some stocks and Mr. Benson, one of our teachers, sat in them. We threw wet sponges at him. I hit him on the nose three times! When it was time to go home they couldn’t find the key to the stocks. Someone said that Jack Chen from my class had run off with it. This made Mr. Benson really mad.

The fire brigade had to come! And guess what? The key turned up on Mr. Benson’s desk on Monday! I wonder who put it there.

36. From the text, we can conclude that...
A. One of the students tricked the principal with wet sponges.
B. Someone played a prank on one of the teachers.
C. The key turned up on the desk on Sunday.
D. The June Fair at school was dull viewing.

37. “This made Mr. Benson really mad.” (Paragraph 3)
The word “this” refers to...
A. the key to the stocks
B. the stock in the fair
C. the hit on the nose
D. the loss of the key

38. “There were lots of stalls...” (Paragraph 1)
What does the word “stalls” mean?
A. a large frame to sit on
B. a wide space with benches
C. a small shop with an open front
D. a narrow stage for a music performance

The following text is for questions 39 to 41.

Trains are very important to transportation. Trains carry freight and people in places all over the world. Freight trains haul goods. Passenger trains carry people. All trains run on tracks.

A train is made up of railroad cars hooked together and pulled by a locomotive. Locomotives are sometimes called engines. Locomotives push or pull railroad cars. They have powerful motors. The motors turn locomotive wheels that run on railroad tracks. Sometimes you will see three or four locomotives hooked together since they have to pull a long freight train up a steep mountain.

Some locomotives get their power from electricity. The electricity comes from wires above the track or from a special third rail next to the track. Other locomotives get their power from diesel fuel which is similar to the gasoline that most cars use. The kind of locomotive engines most used today are diesel-electric. Engines that burn diesel fuel drive generators that make electricity. Powerful electric motors turn the wheels of a diesel-electric locomotive.
38. Why did the four locomotives hook together?
A. They carry freight and passenger train.
B. They turn wheels that run on railroad tracks.
C. They have to pull a long freight train up a steep mountain.
D. They burn diesel fuel to drive generators that make electricity.

40. "Trains carry freight and people..." (Paragraph 1)
The underlined word means...
A. people who travel by train all over the world
B. goods that are carried from one place to another
C. containers kept in the train for the passenger baggage.
D. boxes which are loaded onto the train in the railway station.

41. "They have powerful motors." (Paragraph 2)
What does the underlined word refer to?
A. Passenger trains.
B. Railroad tracks.
C. Freight trains.
D. Locomotives.

Choose the best arrangement to make sense.

Five - under - children - don't - unattended - leave - years
1 2 3 4 5 6 7

42. The best arrangement of the words is...
A. 4-3-6-2-1-7-5
B. 4-5-3-2-1-6-7
C. 4-6-3-2-1-7-5
D. 4-5-3-2-1-6-7

The following text is for questions 43 to 45.

Plants are one of the five main groups of living things. These groups are called kingdoms. The plant kingdom includes such living things as grasses, trees, ferns, bushes, and flowers. Botanists, the scientists that study plants, have counted more than 350,000 species (kinds) of plants.

Plants vary greatly in size and shape. Some plants are so small they can hardly be seen. Other plants tower above the land. The giant sequoia trees of California are one of the largest living things on Earth. They can grow to heights of nearly 365 feet (111 meters)!

Just like animals, plants are made up of tiny structures called cells. But unlike animal cells, plant cells are surrounded by a stiff material called cellulose. Most animals move around and eat other things. Plants are different. Plants that grow on land usually stay in one place and make their own food.

Most plants are green because they have a green chemical called chlorophyll. Plants are different from mushrooms and other fungi. Fungi do not have chlorophyll.

43. What is the main idea of paragraph 2?
A. Some plants are very small.
B. Plants vary greatly in size and shape.
C. Plants can grow to heights of 90 meters.
D. The largest plant is the giant sequoia tree.

44. Most plants are green because they...
A. the chlorophyll
B. the cellulose
C. the fungi
D. the cellulose.
45. "...the scientists that study plants..." (Paragraph 1)
What does the underlined word refer to?
A. The living things.
B. The kingdoms.
C. The scientists.
D. The plants

46. Arrange the sentences into the correct order.

1) So, he climbed down the chimney and tumbled into a pot of boiling water.
2) That was the end of the wolf.
3) Once upon a time, there were three little pigs.
4) They built three houses from straw, sticks and bricks.
5) But, he couldn't blow down the house of bricks.
6) A big bad wolf blew down the house of straw and the house of sticks.

A. 3 – 4 – 5 – 6 – 2 – 1  
B. 3 – 4 – 6 – 5 – 1 – 2  
C. 3 – 5 – 4 – 6 – 1 – 2  
D. 6 – 4 – 5 – 3 – 1 – 2

The following text is for questions 47 to 50.

It was eleven o'clock. Lia, a six years old little girl, was... for her mother at the school cafeteria. Lia was alone. She looked around and waited. After a while, a young woman standing nearby saw her and came up to her. She spoke 48... and was very friendly. When the woman saw Lia's necklace, she snatched the gold necklace from Lia's neck and quickly walked away. Lia was so shocked.

A few minutes 49... her mother came. Lia told her mother what had happened to her. Her mother 50... the incident to the police. The police advised Lia's mother not to let Lia wear jewelry to school. It was a bad day. Nevertheless, Lia's mother was happy that Lia was not hurt.

47. A. Hitting        B. Reading        C. Waiting        D. Wondering
48. A. Sadly          B. Harshly         C. Gently          D. Wildly
49. A. Then           B. Before          C. After           D. Later
50. A. Reported       B. Said           C. Suggested       D. Advised
Appendix 19

Test Sheets of SMP Kesatrian 2 Semarang

UTAMA

UJIAN SEKOLAH

MA TA PELAJARAN : BAHASA INGGRIS
HARI / TANGGAL : KAMIS, 3 APRIL 2014
W A K T U : 07.30 – 09.30 (120 MENIT)
PETUNJUK UMUM
2. Tersedia waktu 120 menit untuk mengerjakan paket tersebut.
4. Periksa dan bacalah soal-soal sebelum Anda menjawab.
5. Lapor kepada pengawas ujian apabila terdapat lembar jawab soal kurang jelas, rusak, atau tidak lengkap.
6. Masalah keras baturu kepada pengawas ujian, bila diperlukan.
7. Tidak diijinkan menggunakan kalkulator, HP, tabel matematika atau satria buku hitung lainnya.
8. Periksa ulasan petunjuk Anda sebelum diserahkan kepada pengawas ujian.

PETUNJUK KHUSUS
Untuk nomor 1 sampai dengan 50 pilih jawaban yang paling tepat dengan menghitamkan a, b, c atau d pada lembar jawab.

Question no. 1 is based on the following notice.

DO NOT FEED
THE ANIMAL

1. The notice means that —
A. visitor must love the animals
B. visitors must not give food to the animals.
C. everybody can see and touch the animals.
D. the people do not have food for the animals.

The following text is for question no. 2 dan no. 3

From: Leonard

Dear Rafid,

Don’t forget to gather at Sakir’s house this afternoon at 3. We’re leaving for the hospital at 3:30 pm. Don’t forget to bring the magazine and the cake that we’ve bought for Rahma.

2. Why did Leonard send the message?
A. To remind Rafid about the magazine and the cake they’ve bought.
B. To remind Rafid about their appointment to go to the hospital.
C. To ask Rafid to gather at the hospital at 3 in the afternoon.
D. To ask Rafid to leave the hospital at 3:30.
3. From the text we can conclude that Rahma might be...
   A. a person who sells cake and magazines.
   B. one of the patients in the hospital.
   C. Rafid and Leonard's teacher.
   D. Suhu's mother.

The following text is questions 4 and 5.

**WORKSHOP ON JOURNALISM**

The Wall Magazine Club will hold a workshop on Journalism in July.
It's a good opportunity for you who are interested in this field.
The workshop will cover:
- The basic, history, and principles of journalism.
- The basic knowledge of a magazine as a mass medium.
- How to write a report.
- How to conduct an interview.
The workshop will be conducted on July 15th.

4. What is the announcement about?
   A. An offer of subscribing magazines.
   B. A workshop on journalism for students.
   C. An opportunity to join the Wall Magazine Club of SMP 39.
   D. An offer to master many techniques in interviewing people.

5. Who is the announcement intended for?
   A. All students of SMP 39.
   B. Exclusively for the Wall Magazine Club.
   C. Fifty students who are interested in journalism.
   D. Fifty elected students who represent their classes.
The following text is for questions no. 6 and no. 7

**KARIMUNJAWA TOUR-2 DAYS 1 NIGHT**

Package tours lasting for 2 days 1 night is held every Saturday-Sunday. Public boat will depart from the port of Tanjung Mas, Semarang.

6. The text mostly tells us about ....
   A. the schedule of the meals the guests are going to have.
   B. the activities the guest are going to do in two days.
   C. the kinds of transportation the guest will ride on.
   D. the kinds of lodging the guest will stay in.

7. What is the main activity for the tourists on Day 2?
   A. A trip to Menjangan Island, swimming with sharks, and visiting the turtle breeding ground.
   B. Enjoying the sunrise from Nirwana Sea Coast.
   C. Rest at the dock of Karimunjawa.
   D. Traveling back to Semarang.

The following text is for questions no. 8 and no. 9

**BATAM ENGLISH CENTRE (BEC)**

To:
Adinda

GET WELL SOON

We miss you very much. We hope you’ll get well soon and come to the English course again.

Eleanor Lovitt
Manager of BEC
8. Mrs. Eleanor LeVitt sends the card because Adinda is...
   A. happy
   B. proud
   C. silent
   D. sick

9. Adinda is one of the ... at the BEC.
   A. students
   B. visitors
   C. patients
   D. fans

The following text is for questions no. 10 and no. 11

It's the end of the semester!
The school year is over!
Come to my house for a 7th grade sleepover!
Friday, May 23rd
After school
3724 Cherry Street
Please bring a sleeping bag
Your parents can pick you up on Saturday at 9 o'clock

Lost of love,
Adiba Salma Zakiya

10. Where does the party take place?
    A. At school.
    B. At Adiba's house
    C. At a camping site
    D. At a cherry plantation

11. Why does Adiba want her friends to bring sleeping bags?
    A. They will spend the night at Adiba's house.
    B. They will sleep in the cars.
    C. They will have party in the park.
    D. They will play hide and seek.
The following text is for question no. 12 and no. 13

**Bali Adventure Tours**

Bali Adventure Rafting is the only Bali rafting company that offers "5 star" service from start to finish. Bali Adventure Tours offers:

- A fully computerized reception center
- A fast walk-through equipment outfitting
- All easy access to the river via safe steps

Do grab your oars and get ready to rage with this exhilarating rafting adventure on the spectacular Ayung River. Whether you are 6 or 76, a natural or a novice, our white water rafting in Bali ride is safe, fun, and breathtaking experience to be enjoyed by the whole family.

End the 1.5 hours action with hot showers, clean towels and changing rooms followed by hot gourmet buffet feast at our private restaurant overlooking majestic mountains and rice fields.

**MORNING RAFTING:** 9:00 – 10:30 a.m. hotel pick up.

**AFTERNOON RAFTING:** 1:30 – 3:15 pm hotel pick up.

Bali Adventure Tours
Jl. Bypass Ngeurah Rai, Pasanggaraan, Bali
Fax: (62-361) 7211481 email: info@baliaventourois.com

12. The Bali Adventure Tours provides... to get to the location of rafting.
   A. meals
   B. safe steps
   C. flashlight
   D. special boots

13. From the text, we can conclude that the afternoon rafting lasts... than the morning rafting.
   A. longer
   B. earlier
   C. slower
   D. faster

The following text is for question no. 14 and 15

**Dear Basir,**

Hi! How are you? Hope you are happy and healthy. You know what, summer vacation is coming soon! I am planning to go your place. My parents are coming too. We are going to fly to Indonesia by the end of this month. We will arrive in Bali and will stay there for one night. After that we will fly to Mataram.

We have been to Bali before, but never been to Mataram, so I need your help to guide us going around your place. I hope you can join us during our visit. I have been on the internet about Mataram, especially about Senggigi Beach and Gili Travangan. They are jaw-dropping!

14. What is kevin's purpose of sending the email?
   A. To explain about the beauty of Senggigi Beach and Gili Travangan
   B. To tell Basir about his plan of coming to Mataram,
   C. To describe about summer vacation in his place.
   D. To tell Basir about his plan on to Bali.

15. "they are jaw-dropping!"
   The underline phrase have similar meaning to...
   A. dear
   B. reliable
   C. amazing
   D. unbelievable
The following text is for question 16 and 18

**SANGALAKI ISLAND**

The best place to see green turtles in East Kalimantan is the island of Sangalaki. This nature reserve is known as the biggest turtle habitat in Southeast Asia.

Every night, around fifty green turtles make their way onto this beach to lay their eggs. Their footprints and the shells of eggs that we have hatched can be found everywhere.

Sangalaki also has a semi-natural hatchery. Eggs that are in danger because they are too close to the edge of the beach are moved to the hatchery by the staff. Those eggs are then left to hatch naturally.

Sangalaki is also one of the biggest habitats of the manta ray. Seeing these creatures up close in the sea is a favourite attraction for divers. These wide-winged swimmers usually travel in groups and when a shoal approaches, it looks like an attack by a fleet of spaceships from a science fiction movie.

16. What is Sangalaki famous for?
   A. The biggest green turtle habitat in Southeast Asia.
   B. Sangalaki also has a semi-natural hatchery.
   C. Some eggs are too close to the edge of the beach.
   D. Some eggs cannot hatch because they are moved

17. What is the main idea of paragraph 5?
   A. These eggs are then left to hatch naturally.
   B. Sangalaki also has a semi-natural hatchery.
   C. Some eggs are too close to the edge of the beach.
   D. Some eggs cannot hatch because they are moved.

18. "...when a shoal approaches" (paragraph 4)
   The underlined word means...
   A. a group of fishermen.
   B. a big manta ray.
   C. a group of fish.
   D. a big ship.
The following text is for question no. 19 and 21

A trip to Bima

Last year, I got a chance to join a student exchange program in Bima regency, Nusa Tenggara Barat. I flew with four other students. We were all from Central Java.

We arrived at Bima’s airport at two in the afternoon by Merpati airlines. I had never been on a plane before, so it was an exciting experience. When we arrived a boy, named Fahriel, had been waiting for us. His friendly father accompanied him. Then, we continued our journey to Fahriel’s village. The name of the village was Sape. Sape was a busy village on the tip of the island. I stayed for the whole month in Fahriel’s house.

During the visit, I had a different activity every day. I came to Fahriel’s school and joined the school activities, but in the afternoon my activities varied.

For the first week, I went to the beaches. Bima had the most beautiful beaches that I had ever seen. They were clean and had white sand. We did not have to pay any tickets to enter the beaches. It was free.

In the second week, I joined the camping activities. It was great fun. Besides having scout activities, we also had dancing and singing performances. Our team performed “poco-poco” dance and won the second prize.

We went to go to the Komodo Island in the third week. It was just six-hour trip by special ship. We had prepared everything. We even had booked the ship. The waves on the sea were big.

Our last week there was spent by watching horse race, watching fish in a Karamba, and learning how to weaves Bimanese traditional cloth.

Though I just spent a month in Bima, I fell in love with its beauty of nature and unique customs.

19. From the text above, we know that...
   A. the writer was teacher.
   B. the writer was a student.
   C. the writer spent the whole week in Sape.
   D. the writer flew to Bima by Garuda airlines.

20. What is the main idea of paragraph 4?
   A. The writer spent the first week in some beaches.
   B. Bima had the most beautiful beaches.
   C. The beaches were clean and sandy.
   D. The beach was free of charge.

21. “They were clean and had white sand”. (Paragraph 4)
   The word “they” refers to...
   A. the beaches
   B. the places in Sape
   C. Fahriel and the writer
   D. the writer and friends
The following text is for question no. 22 and 24

Giring Ganesh

Giring Ganesh is the vocalist of a band group called Nidji. He was born in Jakarta, on July 14, 1969. Because of his activities in Nidji, many people call him Giring Nidji.

Like most of Indonesian people, Giring doesn't have a fair skin. He has medium height, about 173 cm tall. He has a pointed nose and big eyes. His smile is very nice, but the most remarkable thing about his performance is his hair. He has curly hair. He leaves his curly hair long. Of course, it does not go down. It goes up and covers his head like a soft black ball.

Giring and his other fellows in Nidji are very busy. They work in the music studios to record their albums. They also go on tours. They make performances during the tours. They have to cover a long journey to do the tour. Before the tours begin, they do rehearsal almost every day. In every tour, Giring's performance is always attractive. He runs here and there on the stage. He makes the show alive. Just now, Giring was chosen as a dubber in a children film.

22. Giring is called Giring Nidji because...
   A. he is the vocalist of a band group called Nidji.
   B. he was born in Nidji, Japan.
   C. he wants to be popular.
   D. it is his father's name.

23. "... they do rehearsal almost every day." (Paragraph 3)

The underlined word has similar meaning to...
   A. communication
   B. preparation
   C. verification
   D. collection

24. What does the last paragraph tell us about?
   A. Giring’s shows in many parts of Indonesia.
   B. The activities of Giring and his group.
   C. The group activities before a show.
   D. Giring’s part in a children film.

The following text is for question no. 25 to 27.

From Monkey Boy to Choir Boy

John Sesbunya is a boy from Uganda. He is a shy boy and speaks slowly. The might be caused by what happened in his life.

When John was two years old, Uganda was in war. His mother was killed in the war and his father was nowhere to be found. John was all alone and would surely have died. If a colony of green monkeys had not adopted him, he lived with them for three years. He learnt their manners, became skilful at climbing trees, and he eat fruits, nuts, and berries for the next three years.

In 1991, a local woman saw him scavenging for food with chimps and reported it to the people in her village. The people then caught him. It was not an easy job because the monkeys put up a ferocious fight to prevent the people taking him away.

The boy was then taken to an orphanage. There, he learnt how to behave and speak in a human way. As he was able to utter his first words, it was discovered that he has a beautiful voice when he was singing a song. John Sesbunya has now joined a 20-strong Peab of Africa children's choir and has made many tours to different countries.
25. What is the text about?
   A. A boy who had ever been looked after by monkeys.
   B. The impact of the war in Uganda to the chimps.
   C. A boy who joined a famous choir in Africa.
   D. A struggle to find a lost boy.

26. "...a local woman saw him scavenging for food." (Paragraph 3)
   A. searching
   B. begging
   C. scavenging
   D. eating

27. "He lived with them for three years". (Paragraph 2)
   The word "them" refers to...
   A. John's parents
   B. people of Uganda
   C. John's neighbors
   D. the green monkeys

The following text is for question nos. 28 to 31.

A group of frogs were traveling through the woods, and two of them fell into a deep pit. When the other frogs saw how deep the pit was, they said, "The pit is very deep. It's difficult to climb up. You'd better die in the pit."

The other frogs ignored the comments and tried to jump up out of the pit. The other frogs kept trying to stop them because they believed it was impossible to jump out of the deep pit. Finally, one of the frogs took heed to what the other frogs were saying and gave up. He fell down and died.

The other frog continued to jump as hard as he could. Once again, the crowd of frogs yelled at him to stop and just die. He jumped even harder and finally made it out. When he got out, the other frogs said, "Did you not hear us? The frog explained to them that he was deaf. He thought they were encouraging him the entire time.

28. "...and two of them fell into a deep pit." (Paragraph 1)
   The underlined word means...
   A. enjoyed the water in the pit.
   B. tried to jump out.
   C. died in the pit.
   D. cried loudly.

29. "...and two of them fell into a deep pit." (Paragraph 1)
   The underlined word means...
   A. a big hole in the wall.
   B. a large hole in the ground.
   C. a deep hole in the middle of a jungle.
   D. a dangerous hole to trap living things.

30. Why did one of the frogs die?
   A. One of the frogs listened to the crowd and give up trying.
   B. The crowd threw stones on it.
   C. It was drowned.
   D. It was sick.
31. What does the story tell you?
   A. Be careful of what you say. A destructive word can bring someone down, but a good word can encourage.
   B. Be careful when you go through the woods. You can die in the pit.
   C. Be careful to people. They can be your enemy.
   D. Be quick in doing anything.

The following text is for questions no 32 to 35.

How to Treat Bee Sting

1. Safety First! Get away from the bee. Bees release a scent when in danger to attract other bees. If you're still around when reinforcements get there, they'll sting you.

2. Remove any stingers immediately. No need to scrape off bee stingers, just remove them. It's OK to pull stingers out with your fingers, brush them off or get them out any way you can. The longer bee stingers are allowed to remain in the body, the more severe the reaction will be.

3. Victims will almost always develop local reactions to bee stings. Redness, swelling, and pain are all common at the site of the bee sting. The pain will usually go away quickly, but swelling may last for more than a day. Use an ice pack to reduce swelling at the site. It's common to develop some itching at the bee sting site. Antihistamines or calamine lotion should help.

4. Take the victim to the emergency department if the victim was stung more than 10 times, or if there are bee stings inside the nose, mouth, or throat. Swelling from these stings can cause shortness of breath.

5. Use ibuprofen or acetaminophen for minor pain relief. For tenderness at the site, try a bee-sting swab to dull the pain. You can also use an ice pack to help with swelling. Put a cloth towel between the ice and the skin and do not let the ice stay on the skin for longer than 20 minutes. Letting ice sit directly on the skin or keeping ice on too long can result in frostbite from the ice pack.

32. What are the common reactions of the bee stings?
   A. cutting, swelling, and frostbite.
   B. redness, swelling, and pain.
   C. bleeding, swelling, and pain.
   D. breath problems and fever.

33. Why should we take a victim to the emergency department when there are bee stings in the nose?
   A. Because swelling in the area can cause difficulty in breathing.
   B. Because the victims will not be able to smell.
   C. Because the sting may contain poison.
   D. Because the nose is very fragile.

34. „...to long can result in frostbite from the ice pack.” (Step 5)
   The underlined word means injury by...
   A. freezing
   B. needling
   C. cutting
   D. heating

US: Bahasa Inggris / 2014
35. “... just remove them” (Step 2)
   The word “them” refers to...
   A. singer
   B. victims
   C. fingers
   D. bees

The following text is for question no. 36 to 39.

Pigeons is a common name for members of a family of birds. The birds can be found nearly in all parts of the world, especially in warm regions.

Pigeons have small heads, short necks, stout bodies with short legs, and sleek plumage and have a fleshy or waxy protuberance, the cere at the base of the body. The best-known species is the common pigeon. It is about 33 cm in length, bluish gray above, with black markings on the wings and a whitish rump; below, it is purplish on the breast and bluish on the abdomen. The sides of the neck, especially in males, are iridescent. The more than 200 domestic breeds as well as the variably-colored street or feral pigeons are derived from this species.

Pigeons dwell in trees or on the ground and feed on seeds, fruit, acorns and other nuts, and insects. They fly rapidly and are noted for their cooing call. They build loose, almost flat, nests of twigs, bark, straw, and weeds. The female lays one or two tan or white eggs.

36. What are pigeons’ diets?
   A. seed, fruit, acorns, and other nuts, and insect.
   B. small animals, insect, and nuts.
   C. seeds, fruit, and other birds.
   D. insect, acorns and grass.

37. What does paragraph two tell us about?
   A. The description of a pigeon’s body.
   B. The description of pigeons’ habit.
   C. The mating system of pigeons.
   D. The history of pigeons.

38. How many eggs does a pigeon usually lay?
   A. Five
   B. Four
   C. Three
   D. One or two

39. “Pigeons have small heads, short necks, stout bodies...” (Paragraph 2)
   The underlined word can be replaced by...
   A. smaller and thinner
   B. thicker and heavier
   C. more beautiful
   D. colourful
The following text is for questions no. 40 to 43

The Golden Snail

Dewi Galuh Candra Kirana was a beautiful princess. Her father was the king of Daha. She was a nice girl, soon, she would marry Raden Inu Kertapati, the crowned prince of Kahuripan. He was handsome and kind-hearted.

There was one princess who was jealous of Candra Kirana. Galuh Ajeng was her name. She wanted to marry Inu Kertapati. She went to see a wicked witch. "Make her miserable," she told the witch. Galuh Ajeng also said bad things about Candra Kirana to the king.

The king of Daha was very angry with Candra Kirana. He thought her daughter was a bad girl. So, he sent Candra Kirana off the palace.

Poor Candra Kirana. She was homeless. The witch then turns her into a golden snail. One day, the sea took her to a village of Dadapan. An old woman found her. "What a beautiful snail it is?" she said. She took the snail home and took care of the snail. She put the snail in a jar.

Milestones happened at her house ever since. Every day there were delicious meals on her table. "Who cooked these?" she wondered. One day she pretended to go. Actually, she only hid behind the door. Then she saw a big smoke came out of the jar where she put the snail. Then a beautiful princess came out of the smoke. "Who are you?" asked the old woman.

"I'm princess Candra Kirana," the princess answered. The beautiful princess told the old woman her story.

Meanwhile, Prince Inu Kertapati was sad. He looked for Princess Candra Kirana everywhere. Until one day, he came to Dadapan village. He was thirsty so he came to the nearest house. There he found Candra Kirana. They were happy to meet again. Their love broke the witch's spell.

40. What did Galuh Ajeng do to Candra Kirana?
   A. She made Candra Kirana fall in love with prince Inu Kertapati.
   B. She asked a wicked witch to put a spell on Candra Kirana.
   C. She sent Candra Kirana away from the palace.
   D. She turned Candra Kirana into a golden snail.

41. "One day she pretended to go." (Paragraph 6)
   Th underlined word has similar meaning to...
   A. acted as if
   B. learned about
   C. trusted somebody
   D. thought over something

42. What can we learn from the story?
   A. Patience is very important.
   B. Do not trust people that we don't know.
   C. Time is too precious to be wasted.
   D. Love enables us to do bad things.
43. “Make her miserable.” (Paragraph 2)
   The underlined word refers to...
   A. Inu Kerapati
   B. wicked witch
   C. Galuh Aji
   D. Galuh Candra Kirana

44. Arrange the words to form a good sentence
   do  please  not  or  enter  during  the  room  speeches  leave
   1   2     3  4       5   6    7   8  9      10
   A. 1 - 3 - 10 - 9 - 4 - 6 - 5 - 7 - 8 - 2
   B. 1 - 3 - 5 - 2 - 7 - 8 - 6 - 4 - 10 - 9
   C. 3 - 1 - 3 - 10 - 4 - 5 - 7 - 8 - 6 - 9
   D. 2 - 1 - 3 - 10 - 4 - 7 - 8 - 5 - 6 - 9

45. Arrange the words to form a good sentence
   birthday  my  the  kitchen  brother  And  I  my  sister  helped  make  it  cake  in
   1   2     3  4       5   6  7  8  9 10  11  12  13
   A. 2 - 8 - 5 - 6 - 10 - 11 - 12 - 13 - 7 - 1 - 3 - 9 - 4
   B. 2 - 8 - 5 - 6 - 10 - 12 - 13 - 11 - 7 - 1 - 4 - 9 - 3
   C. 2 - 4 - 5 - 7 - 11 - 1 - 13 - 3 - 10 - 6 - 9 - 10 - 8
   D. 2 - 4 - 5 - 6 - 9 - 7 - 8 - 10 - 11 - 1 - 12 - 13 - 3

For questions no. 46 – 48, complete the sentences with the words provided.

I was walking along Main Street at about 10 a.m. when I saw blue car stopped outside the bank. Next thing I saw is the man with a mask on. He ___46___ out of the car and ran into the bank. I ___47___ walked up to the door of the bank and looked in. By this time the robber had everyone in the bank lying on the floor. At this point hurried to the telephone box on Park Road ansf ___48___ the police.

46. A. sat
    B. yelled
    C. drove
    D. jumped

47. A. because
    B. unless
    C. then
    D. even
49. Arrange these sentences into a meaningful descriptive text.
1) It also has a collection of novels and anthologies of short stories.
2) There is a library in my school.
3) Besides reading, students can also access any information through internet connection sets in the library.
4) It is not very large, but it has a complete collection of books.
5) It has a collection of newspapers, tabloid and teen magazine.

The best arrangement for sentence is...
A. 3 - 5 - 2 - 1 - 4
B. 3 - 2 - 5 - 4 - 1
C. 2 - 4 - 5 - 1 - 3
D. 2 - 4 - 3 - 1 - 5

50. Arrange the following sentences to form a good narrative text.
1) It ran into the street and market.
2) One day, a young elephant ran away from a zoo.
3) When it had been full, it walked on the nearest park.
4) Then, it settled there and fell asleep.
5) It ate the food and vegetables sold in the market.
6) The next day, the zookeepers sent the young elephant to the jungle.
7) When the zookeepers came they knew what they should do.

The best arrangement for the sentences is...
A. 7 - 1 - 5 - 3 - 4 - 2 - 6
B. 7 - 5 - 1 - 3 - 4 - 2 - 6
C. 2 - 3 - 5 - 1 - 4 - 7 - 6
D. 2 - 1 - 5 - 3 - 4 - 7 - 6
